North & Fisher join forces to bring you the world’s best Flying Scot sails & service

Yes, you heard it right . . .
North Sails and Fisher Sails have merged! Now Flying Scot sailors have access to the most comprehensive one-design experience in the world.
The same legendary Fisher Flying Scot designs that have won four out of the last five North Americans are still available. 
You’ll also get the same outstanding reliable personal service. Add to that the famous quality and support from the North Sails organization and you’ve got an unbeatable combination.
Look for the same Fisher and North representatives on the Flying Scot circuit. We’re anxious to help you get the most out of your sails, and are always ready to help you make your Scot sail even faster.
We hope you’ll continue to consider us your personal sailmaker!

"Give me a call. I'm fired up about this change! I'd love to tell you why it is going to be so great sailing with the North Team."

JIB SHEET CLEATING ATTENTION

Based on the amount of mail and calls received, we have put off the vote on the proposal regarding Jib Sheet Cleating. Your response indicated that we were moving too fast with this vote, considering how long seat cleating has been allowed by the class.

New articles will appear in Scots n' Water in the next issue, both for and against the proposal. We apologize for the agony and inconvenience that may have been created with the announced vote. Please rest assured that our intentions were to act fast and decisively on a potentially divisive issue, not to do a "railroad job."

Please let your Fleet Captains, District Governors and class officers know how you feel regarding the proposal. The vote will be taken at the Annual Meeting in July at the National.

Taken from a memo written by Bernie Knight, President FSSA

TO THE EDITOR

The following is a letter that Bernie Knight, FSSA president received and his response that he has turned into an open letter so that we are all more knowledgeable and can, perhaps answer these same questions to our non-scot friends and acquaintances.

I have noted articles featuring the Flying Scot in several sailing magazines this year. Congratulations on achieving the exposure!

In each article, the theme that the Scot is a family boat and that she can be handled by a novice is stressed. I will agree with that up to a point. Almost a dozen folks, plus Grandma, can fit in a Scot and she can be skippered by a novice; all without making anyone aboard feel uncomfortable. On the other end of the scale, a novice can single-hand her in a moderate breeze and even launch the chute.

The boat is very one-design; perhaps only because Sandy Douglass would not allow any changes that he felt so corrupted his other designs.

These qualities would seem to make her an ideal day-sailor and one-design racer. And in fact, she is one of the most popular one-designs in the US.

You know all this, so why am I writing? Simply put, the massive stability that the Scot has, that makes grandma feel safe, lulls the crew into complacency. They feel just as secure as sitting on their living room couch. I know, I have sailed a Scot several times. I have also seen countless Scots sailed in a fresh breeze with the entire crew sitting on the lee side.

This false sense of safety leads the unsuspecting sailor to take risks; risks that they might not willingly assume, if they knew that the division between feeling snug and secure and broaching is very thin line, as Scots capsize all of a sudden. There is very little warning that things are getting out of hand. At least the tipsy boats rock you around and give warning well before their limits are reached.

OK, the Scot will capsize, so what, any boat will under certain conditions. OK, the crew gets wet and someone’s pride might be wounded, this is still no big deal. The complaint I have is, that like all of Mr. Douglass’ designs, she is not self-rescuing. Once swamped, she can not be sailed. She must be towed and towed very gingerly to prevent her from going over again. This is quite a trick when the wind is strong enough to capsize a Scot.

When you combine the false sense of security that she gives with the fact that she is not self-rescuing, you have a life threatening situation. That is not a desirable feature for a family boat.

I have rescued a few Scots sailed by people that had no idea of the situation they were putting themselves and crew in. After the last rescue, (two in one day), I resolved not to score any boat that is not self-rescuing, when the weather conditions might lead to the death of a capsized crew by hypothermia. Even relatively warm water of 60 degrees, can cause death if you remain in it an hour or so. And an hour is the minimum time to tow a Scot a mile or so back to shore.

What do I think should be done? Two things.

For the short term, I feel the FSSA should continually caution their members of the risk of sailing anytime the breeze is above, say 15 knots, and the water/air temperature is not warm enough for sustained exposure. The risks are greater for day-sailors than for racers. At least when racing, a capsized boat will be noticed, sooner or later, and rescued by a power or sail boat is assured.

For the longer term, I feel the FSSA should require that positive floatation be added to the Scot. For new boats, the cavernous spaces in the bow and transom and under the seats, that provide so much storage space and for hundreds of gallons of water, should be closed.

For existing boats some type of floatation should be required to be added. I doubt existing boats could be modified, (at a cost reasonable enough to be accepted), to make them self-rescuing; but at least enough buoyancy could be added so she would be stable enough to be sailed after righting.

Why should these actions be taken? To avoid the loss of life. In my way of thinking, the Scot is a ticking time-bomb. That no one has died and that the deceased family has not sued the manufacturer and the FSSA is remarkable.

There will always be fools and people that will take risks. However, it is another thing to actively promote the Scot as a safe family sailer, when experienced sailors know there is no such thing, under all conditions. The Scot is a first boat for many people that have little or no experience to evaluate such risks.

There is a need for a safe family sailboat and the Scot so nearly fits bill. Why not make her a really safe boat? Safe even for the unsuspecting novice.

Sincerely, Don Malpas

Thank you for your thoughtful letter regarding the capsizing characteristics and inherent safety of the Flying Scot. Please forgive the time interval required for my response. I returned from an extended business trip in Europe to find your letter had arrived some weeks prior. I have reviewed your letter with the Executive Committee of the Flying Scot Sailing Association, and all thank you for the time you took to express an evident interest in the safety of the Flying Scot. We share your interest in the safety of the boat and spend a lot of time and effort promoting knowledge and safe practices with the Flying Scot.

First, you must realize that it is the individual skipper’s sole responsibility to decide whether conditions are unsafe to be out in ANY boat. No boat is totally safe in ANY conditions. This is why education, knowledge, and basic skills are so very important to boater safety. The Flying Scot Sailing Association through its magazine, Scots n’ Water actively promotes boating safety and communicates knowledge and boat handling techniques. Individual fleets continue this education process by conducting seminars and capsize drills.

I have to respectfully disagree with you that the design of the Flying Scot promotes a false sense of security because of an alleged tendency to capsize suddenly and without warning. I personally have a great deal of time in the boat in heavy weather conditions, and I have capsize the boat more than once. I disagree that during a capsize things happen suddenly. In fact, the process is so gradual that there is plenty of time to rescue the boat before it ever gets over if a couple of basic steps are instinctively followed. I once had the boat so far over in a violent gust in the Potomac River that there was water in the seats. By letting go the mainsheet the boat rescued itself before I could get to the high side, much less onto the centerboard. This is an example that other sailors have experienced.

Thank you for your clarification of the record of the Scot. As you have seen, the FSSA has a number of capsizes that have been reported, but we have no record of any capsizes that have resulted in loss of life.

(Continued on page 5)
To The Editor
(continued from page 4)
ample of the importance of at least rudimentary boat handling knowledge. Anybody who sails any small boat in conditions where the boat is likely to get knocked down without holding the mainsheet CONTINUOUSLY is an idiot. Besides it is slow to cleat the main and just steer the boat. Sandy Douglass fought the presence of mainsheet cleats in his boats for years.

Okay, given that the boat can and does capsize, prompt action by the crew by getting weight onto the centerboard will prevent the boat from turning turtle and filling with water. The boat is then righted and can be sailed away with only a couple of pints of water inside. This does not always work, and sometimes the boat will turn turtle and fill with water. I'll admit that when this happens, you've got a chore on your hands. However, again with some rudimentary knowledge a swamped Scot can be successfully towed by a powerboat.

The Class has debated in the past about adding bulkheads, double bottoms, and bailers. It was generally concluded that the design of the boat is not conducive to any of these add-ons without ruining the desirable characteristics of the boat. In fact I would argue that such boat configurations actually do more to lull people into a false sense of security, which we both agree is a bad thing. In such boats the fundamental skipper's decision on whether to even go out or not takes less emphasis.

A number of us have installed opening ports in the transom of our boats. With transom ports a Scot can be towed dry and then sailed away again without going ashore. It does require a little bailing to get the boat completely dry. I know, because I have done this as race committee before.

I do believe personally in the convenience of transom ports for rescuing a swamped boat. Transom ports can be installed in any Scot in about an hour for less than $20. However, I DO NOT RECOMMEND a boat owner doing this on his own without guidance from his boat builder due to the potential for corrupting the structural integrity of the hull. In fact, Flying Scot, Inc. offers a kit, including instructions for installing transom ports.

I hope, Mr. Malpas, that my comments are somewhat helpful to you. In addition, I shall send your letter and this response to the Editor of Scots n' Water for printing as a part of our efforts to keep boating safety and the importance of knowledge on the subject highlighted.

Sincerely, Bernard A. Knight, President FROM THE EDITOR

I received a copy of an article from the 1991 National Marine Manufacturers Association from John _____ of the Flying Scot Inc. that I thought I would share with all of you:

NBC NIXES OLYMPIC SAILING: the sport of sailing has suffered a setback in its efforts to build television viewing interest, at the hands of NBC. The network has decided to drop sailing from its televised coverage of the 1992 Olympics, despite strong response during the 1988 Olympic sailing venue. The industry is encouraging all sailors -- who represent an unscalable viewing audience for TV sponsors -- to express their disappointment about the lack of coverage in a letter writing campaign to NBC. Such campaigns have been successful in the past. Letters should go to Dick Ebersol, President NBC Sports, 30 Rockefeller Plaza, New York NY 10112.

I think that being part of this letter writing campaign would be a benefit to sailors and to FSSA. Please take the time to write Mr. Ebersol and perhaps encourage other sailors in your area to do so too.

I have also had many inquiries into the dates of getting material to me so that it will appear in the next issue. Although it seems odd, it usually takes four months from my receiving information until it comes out in Scots 'N Water at your home. Therefore I have made up the following chart to go by.

<table>
<thead>
<tr>
<th>DEADLINE FOR SCOTS 'N WATER</th>
</tr>
</thead>
<tbody>
<tr>
<td>If you want yours to be in</td>
</tr>
<tr>
<td>Needs to be to me by</td>
</tr>
<tr>
<td>JANUARY/February...................November 1st</td>
</tr>
<tr>
<td>MARCH/April....................January 1st</td>

</tbody>
</table>

It sometimes takes the mail a week to get to Mahomet so you might also mail before the deadline.
I also have a FAX in my office that is on 24 hours a day (217) 355-2587.

GORDON K. "SANDY" DOUGLASS

Designer of our Flying Scots, passed away Wednesday, February 12, 1992. His passing will leave a large void in all of our hearts that knew him, and also within the class, his support will be deeply missed. Sandy spent so much of his life designing, sailing, and believing in the boats he built. We are very fortunate to have the results of Sandy's work a major part of our lives.

There was a private family service where Sandy's ashes were scattered into the winds from a mountain top in New Mexico. "That way," said Bernie Knight, FSSA President, "Sandy will always be with us as we sail and race his beloved Flying Scots.'

Our condolences to Sandy's family and friends.

The September/October issue of Scots 'N Water will be dedicated to the memory of Sandy Douglass. Please write your memories, send any pictures you might have with Sandy in them, (they will be returned to you) and submit any stories you might like to share with us about Sandy for this upcoming tribute. Lynne 'Sunshine' Hartman, 1209

MARCH/APRIL
SAIL THE MIDWEST’S BEST...
1992 NORTH AMERICAN CHAMPIONSHIP
JULY 11-17 * CARLYLE SAILING ASSOCIATION

LOCATION: This year’s NAC will be held on Lake Carlyle, about 55 miles east of St. Louis. Your host is Fleet 83 or Carlyle Sailing Association, with substantial support from Fleets 135 and 23. Winds are generally 5-15 MPH in July. Please join us for a week of fun and good sailing and Steve Hartman’s cooking.

TENTATIVE SCHEDULE OF EVENTS

Saturday, July 11  Registration, Measuring
Sunday, July 12  Women’s Races (3)
                Juniors’ Races (3)
                Registration, Measuring
                1715 Skippers’ Meeting
                Trophies for Women and Juniors
                1800 Welcoming Function
Monday, July 13  AM-Qualifying Race
                PM-Qualifying Race
                1800 Cookout at CSA
Tuesday, July 14 AM-Qualifying Race
                PM- 1600 Executive Committee
                1730 Board of Governors Meeting
                1930 Board of Governors Dinner
Wednesday, July 15 AM-Championship Race
                PM-Championship Race
                1800 Cookout at CSA
Thursday, July 16 AM-Championship Race
                PM-Championship Race
                Evening - Annual Meeting and Dinner
                1830 Annual Dinner
Friday, July 17  AM-Championship Race
                1830 Awards Dinner

HOTELS AND MOTELS IN THE AREA

CONTACT: Hotels directly for reservations or Jim Harris for additional information (314-966-8404)

CAMPING

An excellent campground is adjacent to CSA and offers tent, trailer and RV spots with water, electricity and showers.
Boats will be dry sailed with parking provided. There will be a Women's and Juniors' Regatta scheduled to be sailed on Sunday, July 12 if a five boat minimum registration is met, by class, by July 1. Contact Suzie Knight for information, 314-874-0416.

Carlyle Sailing Association, the site for the 1992 Flying Scot Nationals, has been the location for 3 previous NAC regattas. Excellent reserved boat parking facilities are provided. Registration forms are provided below for the Juniors, Women and Championship Series. Please plan to sign up early so that the NAC Committee will be in a better position to properly plan for this annual sailing regatta.

**MARCH/APRIL**
1992 FLYING SCOT CANADIAN CHAMPIONSHIP

A REGATTA TO BE REMEMBERED AUGUST 15-16, 1992

The 4th biennial Flying Scot Canadian Championship will be sailed on Stony Lake August 15 and 16, 1992. Hosts for the FSCC will again be FSSA Fleet 148 and The Stony Lake Yacht Club.

Tentatively, we plan a five race series with three races Saturday and two Sunday. Awards will be presented to the first five places. To round out the weekend we'll have a Saturday evening Juniper Island dinner and dance.

Among the many well known Scot sailors who have taken part in previous FSCC's are Bubby Eagan and Mac Hadden (winners in 1986 and 1990), Jack Orr, Jack Stewart, Graham Hall, Mike Cullen, Dave Jacobsen, and Dan Goldberg. We hope to see all of them, as well as many others, in August 1992.

This FSCC is being planned as part of our strategy to promote the Flying Scot in Canada, where we believe there is tremendous opportunity for growth in the class, and we want to make it an outstanding event. Our hope is that many Scot sailors will join us for this important regatta and in so doing, not only enjoy a great sailing experience with top level competition, but also help us with these class building efforts.

Stony Lake, twenty miles north of the city of Peterborough, is part of The Trent Severn Waterway connecting Lake Ontario to Georgian Bay in central Ontario. An hour and a half drive northeast of Toronto, it is a unique community of summer cottagers who come from all over North America.

Previous FSCC participants will tell you that Stony Lake sailing is a very special experience. It includes a highly competitive fleet; lots of good open clear water; beautiful island scenery; August winds averaging 12-15; fun parties; and warm hospitality.

Watch for further FSCC 1992 news in future issues of "Scots n' Water".

1992 FSCC Chairman Fax: 416-444-4491

FULLY BATTENED MAIN GREAT FOR DAYSAILOR

Paul L. Schrieber # 918

Fully battened main adds sailing days and comfort to #918 since the Spring of 1990. Pictured above, son Dave takes me for a warm-up in a freshening breeze at Chautauqua before taking his family which includes two small children for a sail.

When I originally got it the fully battened main was considerably slower than my standard main in light air. After learning to tighten it up more this fuller sail is almost as fast in light air and faster and more comfortable in heavy air. In extremely heavy wind my wife, Norma, and I were beating upwind with the fully battened main reefed and no jib when a C Scow with four young fellows tried to pass in our lee. They were taking so long that they finally decided to go off on a reach.

Take note, those fast new 1992 America's Cup boats have fully battened mains.

Sailing on a gusty day is more comfortable because the fully battened main doesn't flog. The quieter more even sailing makes guests happier and the longer lasting sails make the captain happier.

More days are spent sailing from our home port of Davis Hollow Marina at Lake Arthur with this sail. Since it takes an hour to drive up and an hour to drive home it isn't any fun if the wind is too strong to sail. This is especially important if we have taken friends to have a nice comfortable sail.

I chose North Sails, San Diego, California sail loft to make the fully battened main for me because of their long experience in making them for similar sized boats. The sail is very professionally done of dacron and at my request has one set of reef points and a window. The sail is bent to the mast with a luff rope like the standard sail.

Installing the four long battens, one nearly as long as the boom, takes additional time and trouble compared to the short ones. However, I keep #918 at a marina dock with the main flaked and covered so this is not a factor for me. It takes less time and trouble for me than the standard sail which I used to install and remove for every sail.

We have been sailing with a fully battened main for two years. We are so satisfied with it that we haven't had the standard main on the boat since we first put on the fully battened main.

My wife and I have enjoyed sailing more with the fully battened main as have our guests. In fact our boat is named N'JOY (N for Norma).
WHAT ABOUT BOB AND MY FLYING SCOT?

Bruce Pennino

Most coastal New Englanders will remember the summer of '91 because of Hurricane Bob. For those not on the East Coast I will quickly summarize the storm. Bob formed in the Caribbean and quickly came up the coast. At times the storm was moving 50 or more miles per hour. Top wind speeds were in excess of 130-140 mph. Others can give you all the nitty-gritty details.

Bob beat up Narragansett Bay, pulverized Buzzards Bay, and created havoc across Cape Cod Bay. In Buzzards Bay helicopters were used to retrieve boats that had been driven "way up" on the beach. My FS (#1777) was moored to a 150 lb. mushroom anchor on the flats in Duxbury Harbor which is adjacent to Cape Cod Bay and north of Plymouth, Massachusetts.

My wife and I had been away for the weekend. When we returned home that Sunday night, I was surprised at a friend's concern about his 34 foot Sabre. He had put out four anchors, etc. My exact words were "Isn't Bob still in North Carolina?" I, and many others, never appreciated how fast that storm was moving. I checked, and of course my friend was correct. Given the facts that there was little time, no one to really help me get the boat out, and there were other priorities around the house, I decided to do nothing. The whole thing didn't strike me as much fun. In fairness I should point out, that this was the first year with this well-used boat and I had read about FS's indestructibility-falling off trailers and other wild stories. I figured, at the worst, I would retrieve the boat from someone's beach front property. Maybe the boat would have some minor damage. Since I'm not a believer in "extra" insurance, the FS is self-insured. This produces interesting discussions since my wife is a product of a family that has run a successful insurance agency for more than 70 years.

After the storm, I learned that the Duxbury Harbormaster had tried to call me to say that most boats were being removed from the harbor. I tried to reach them, but they worked all night and this truly minimized the damage compared to other harbors. My FS was left in the harbor with a few other boats.

The eye of Hurricane Bob passed in the vicinity of Duxbury which took a real pounding. Peak winds were probably 100 mph or more. Because of storm damage around my home and work, it was a week before I could drive to Duxbury from Holden. When I got there, it was eerie to see a virtually empty harbor. With the early morning sun shining in my face, I couldn't recognize my FS way out in the harbor. I did see a low floating hull approximately where my boat was moored. This really perked me up. I motored out in my dinky-I didn't row because I had assumed I'd be motoring all over the harbor.

FS #1777 was floating 1 ft. low in the water, filled with an incredible amount of sand and seaweed from breaking waves. The mast, still partially attached to the boat, was stuck in the bottom of the harbor.

On the transom of the boat was the ugliest, grubbliest sea gull I've seen in my life. The transom looked like he had been well fished over the previous week. As I motored up to the FS, this bird looked at me as if I were the intruder on his domain. I maintain that God had an off moment when he created sea gulls, but more on this later. It wasn't until I actually climbed into the boat that the bird grudgingly took off.

A quick check indicated that the hull was fine and I bailed out the boat. It was not immediately simple to figure out why I had lost the mast. At first I thought the violent up and down motion had unstepped it, but this did not fit with reality. The hinge pin, which is a couple of inches long, was completely bent over. It was also unreasonable to think that the stays would have stretched so much.

(Continued on page 10)
What About Bob
(Continued from page 9)

With a sailor's fascination, I traced the stays from the chain plates on the hull. I realized that one of the side stays was no longer connected to the fitting located near the top of the mast. After that the rest was easy. I retrieved the mast from the bottom and tried to get as much of the silt out of it as possible. The nut on the bolt that holds the side stays to the mast had come undone and one stay had slipped off. Down came the mast. The bolt was still there and the mast wasn't bent-talk about good luck. I motored over to Long Point Marine and they straightened the hinge fitting and sold me a locking nut. Real fine folks. After owning sailboats for five years, and doing reasonable maintenance and repair, I admit that the fitting had never even been looked at.

Getting the mast up was the next problem. Somewhere I had read that Sandy Douglass put the mast up with the boat in the water. So after rigging the stays for putting up the mast, and using a separate line with a pulley mounted on the bow eye for tying off the mast after it was vertical, I raised the mast. I confess it is nice and safer to have a helper, and easier to do on a steady trailer. I checked the halyards and all was fine. Flying Scots are tough. There are any number of lessons in this story, but the major one for me is to check every fitting.

Now, about sea gulls. I am not one of their fans. Other sailors have told me stories about being driven below when eating gulls taking hamburgers off a rail mounted grill, etc. A friend, who doesn't like sea gulls very much, swears that some dumb sea gull landed on a hot grill and stood there first on one leg and then on the other, waiting for a hand-out. Two Navy guys I know got even with one bird. They attached one end of a fishing line to a pork chop bone. The other end was attached to the stem rail. A sea gull snatched the pork chop bone and off he flew. When he reached the end of the line, he had quite a surprise. I bet he is still going to a chiropractor! Then there is the story about two fish a friend hooked to opposite ends of a fishing line. One sea gull picked up the fish, but other gulls went after the other fish—it must have been fun to watch. I propose that all readers who have outrageous sea gull stories send them to the editor. It could make an interesting column.

WANTED: Good home with loving family for FS #3829. Must be committed to regular outings during the sailing season, with racing strongly preferred. Reasonable compensation to present owners required.

This is the story of a Scot which has been resting in a barn in Connecticut since the late summer of 1990. It's history includes a time as a "trailer queen" in the boatyard at Lake Carlyle. But that was before Peter and Kathy Oulevey bought the boat in 1989.

Peter and Kathy brought youthful enthusiasm and a new joie de vivre to Fleet 83 at Carlyle. Anxious to sail in the spring, they trailered the boat in and out before the club and the hoists opened up. Between Sunday races they pumped the experienced skippers and crew for tips and suggestions. They were always ready to stay for a Sunday evening cookout or bring friends out for a weekday evening or moonlight sail (See Chris Sullivan's "First" in the July/August Scots n' Water, p. 17). One of their favorite stories is about the time a seaplane took off from the lake—without lights!—on a moonlit night, just a few hundred feet from where they were sailing. The Ouleveys crewed for Jim Harris at the 1990 Mid Winters. They have been among the revelers at the Glow in the Dark, Whale of a Sail and Barging regattas. By the summer of 1990 they were providing serious competition for the "Old Salt" on the race course. On one occasion they capsized the boat on a reach but immediately righted it and finished the race. In 1990 they helped Fleet 83 host the Midwest Districts by obtaining some great sweatshirts and trophies.

So why is FS 3829 in that Connecticut barn? Because it doesn't make sense to ship it to Switzerland. Peter and Kathy now make their home in Geneva, where Peter has family roots. The opportunity to spend a few years in Europe was just too good to pass up. They want to get involved in the local sailing scene but have to admit that, even with their dedication and love of the boat, getting a Scot fleet started on Lake Geneva is probably out of the question.

Peter and Kathy would like to buy some type of boat which has an active racing fleet in their new home. But to do so, they need the money invested in their Flying Scot. And they won't sell it to just anyone. Peter vows it will not be a "trailer queen" again. Can anyone out there give it a good home? Contact the Ouleveys, 16 Rue de la Gare, CH 1197 Prangins, Switzerland.
1992 WIFE-HUSBAND NORTH AMERICAN CHAMPIONSHIP
Deep Creek Lake, Oakland, Maryland
June 19-21, 1992

The 1992 Flying Scot Wife-Husband North American Championship will be held June 19-21, 1992 on Deep Creek Lake near Oakland, Maryland in the western panhandle of Maryland. The event is organized by Fleet 6 and will be hosted by the Deep Creek Lake Yacht Clubs located at Deerhaven and Turkey Neck in coordination with the Deep Creek Yacht Racing Association. The series of 5 races is open to all bona-fide wife-husband teams who are FSSA members. There will be no boat or sail measurement. Moorings are available at both clubs and will be assigned at registration. However, facilities for daysailing are limited to 8 boats and will be given out on a first come, first serve basis. The chairman of the event is Charles Buffington, Fleet 6 Captain, home - 107 Rock Haven Lane, Pittsburgh, PA 15228, 412-563-2750 or lake - 301-387-7245.

Registration: $60 ($50 if preregistered by 5/31/92) which includes trophies, beer, soft drinks, Friday evening snack, 3 meals on Saturday, and 2 meals on Sunday for two sailors. Meal tickets are available for non-sailing adults @ $16 and for children @ $8. Registration can be made by mail or in person at Turkey Neck Yacht Club on Friday, June 19 and Saturday, June 20. Checks should be made payable to Flying Scot Fleet 6 and mailed to Daniel R. Muss, Rt. 1, Box 66A2, Swanton, MD 21551, 301-387-9528.

Schedule of Events: All meetings and meals will take place at the Turkey Neck Yacht Club.

Friday: 8:00 AM to 4:00 PM - Boat company drop-in tours
12:00 N to 8:00 PM - Rig and launch
3:00 PM to 9:00 PM - Registration
6:00 PM - Snack

Saturday: 8:00 AM - Breakfast
8:00 AM to 9 AM - Registration, rig and launch
9:30 AM - Race meeting
10:30 AM - 1st and 2nd races back to back, return to club for lunch, 3rd race to follow
6:00 PM - Hors d'oeuvres, supper, and social

Sunday: 8:30 AM - Breakfast
10:00 AM - 4th and 5th races back to back
1:00 PM - Lunch
2:00 PM - Awards

Housing and Lodging: Please note that this is a summer resort area and reservations should be made early. Consider taking extra vacation time to enjoy our scenic area, relax fishing, sail casually, go antiquing, or visit the boat company. It can still be quite chilly in June in our mountainous climate, so pack warm clothing.

We invite participants to stay in homes of local fleet members. Limited, primitive camping is available at Deerhaven Yacht Club. To arrange for local housing or on-site camping, please contact Audrey MacMillan at work 412-647-2562 or at lake - Rt. 4, Box 3425, Boy Scout Road, Deer Park, MD 21550, 301-387-7120. Please indicate number of guests and any special needs, i.e. children, smoking, non-smoking, etc.

Should you prefer to make your own arrangements, several motels with reasonable rates are within 15-20 minutes driving distance: Oak Mar Motel - Rt. 219 in Oakland, 301-334-3965; Town Motel - Rt. 219 in Oakland, 301-334-3955; Alpine Village - Rt. 219 north of Oakland and midlake on western side, 1-800-343-5253 or 301-387-5534

Three camping and RV areas are 20-30 minutes away: Double G Ranch - P.O. Box 25, McHenry, MD 21541, 301-387-5481, at north end and off the lake, Glen Acres - Rt. 2, Box 162-W, Swanton, MD 21561, 301-387-5149 or 367-9596, on lake midway along eastern side, Deep Creek Lake State Park - Rt. 2, Swanton, MD 21561, 301-387-5563, on lake midway along eastern side. For any additional information, contact the Garrett County Promotion Council at 301-334-1948.

Childcare: Babysitting will be available at Turkey Neck Yacht Club for a nominal charge. So that we can plan for age-appropriate activities and safe supervision, please contact in advance Gail Black (home-717-243-9629 or lake-301-387-6290) and provide information on your child' s age, sex, nappling requirements, allergies, meds, special needs. Limited facilities are available for infants and toddlers.

Registration forms, additional information, and a detailed calendar of events will also be in the May/June issue of Scovts n' Water.

1992 Wife-Husband Championship Registration Form

Names: ________________________________
Address: ________________________________
City: __________________ State: ___________ Zip: ___________
Sail #: ___________ Fleet #: ___________ Location: ___________

___ I'd like to stay with a local member
___ I'd like to camp onsite
___ I'll make my own arrangements for housing
___ I'll need childcare - give names and ages of children
___ I'd like to buy meal tickets for _______ non-sailing adults and _______ children

Registration is $60 ($50 if paid by 5/31/92). Make check payable to FSSA Fleet 6 and mail with this form to Daniel R. Muss, Rt. 1, Box 66A2, Swanton, MD 21551, 301-387-9528.
Scots Moving West

Charles Bencik

The Flying Scot class has made a notable splash in southern California, judging by the reaction to FS 4808’s appearance at the San Diego Boat Show November 20th thru the 24th. This is the first appearance of the class in a southern California show in about a decade, and it caused quite a stir, not only among transplanted New Englanders, but also among the jaded California power boaters and deep-keel cruisers.

The Flying Scot was one of only 5 trailerable sailboats in this power-dominated show. Surprising was the number of Scot owners among exhibitors and visitors. Bob Sharp (FS 586) was there from Riverside, CT, showing a line of inflatable sailboat. Also Dirk Lewis (FS 3662) of Duxbury, Massachusetts was on the floor. One remarkable moment came when Tom Ehman, three-time national Flying Scot Champion, former secretary and 2nd VP of FSSA, and now Executive VP and General Manager of the America’s Cup Organizing Committee, visited the Flying Scot display, and lingered to recall the late 70’s with Fleet 20 on Portage Lake...

Many who came to admire FS 4808 – looking outstanding in white with Navy blue waterline and trim stripes – stopped to recall fondly their earlier years or memories of the Flying Scot. A lot of them said things like, “She’s a nice East Coast boat,” something I expect to hear less and less in the future.

To one who has sailed a Flying Scot almost 14 years, a boat show helps one realize what remarkable features the ‘Scot incorporates. Such things as the centerboard winch, traveler-free rigging, halyard winches, jib-halyard forestay tensioning, and the handy “glove-boxes” are features most trailer and cruising keel boat owners don’t see. Old-time ‘Scot sailors were glad to see the jiffy reefing option, which could be demonstrated in less than a minute. The inevitable questions about “nature’s call” helped all achieve a realistic definition of “daysailing” and “family racing.” The upgrade to all-Harken fittings, and the wonderful new gel-coat finishes were a universal hit. Finally, the ever-popular hull-thump test proved that no other boat could match the Flying Scot for solid durability.

The Flying Scot video was on display, and generated a lot of excitement, with its scenes of blazing windward planing runs, and planing spinnaker reaches. Families, liking the roomy cockpit, were impressed by the way the ‘Scot first defied Graham Hall’s efforts to capsize her, and then floated safely until easily righted, after he succeeded in bringing her down onto her gunnels. Hall, in San Diego with the America 3 syndicate for the defense of the America’s Cup, and hailed as a “match racing wizard,” is Bill Koch’s multi-talented sailing coach. He produced (filmed, narrated, postpro-

Kids, big and small, seem to find the Flying Scot just right, at the recent San Diego Boat Show.

(Continued on page 13)
Scots Moving West
(Continued from page 12)

duced, etc., etc.) the latest Flying Scot video. Having recently bought and refurnished FS 460, he uses his boat as a teaching aid, and instructs a sailing class for the family members and non-sailing staff of America 3. A scion of the Graham clan of Scotch highlanders, he made guest appearances in his Graham-plaid kilts and tartan, and, at the drop of a burl, was wont to pull his harmonica from that watchamacallit hanging on the front, and render “My Bonnie Lassie” for all and sundry.

Fifty-odd visitors signed up for trial sail dates, and others for newsletters and literature. Among these were a prominent lawyer from the area, currently owner of a power boat. One customer has placed an order for a new Flying Scot, and two or three others say they’re similarly inclined.

Perhaps most satisfying was the coincidental activity of the newly formed San Diego Flying Scot fleet. Chancing to be at the show at the same time, the first fleet membership meeting took place, and a date set for the first fleet regatta. A visitor to the Flying Scot display, seeing her at the show, let us know about another ‘Scot owner, up near Camp Pendleton. Scot Thom (FS 73) has since joined the fleet, bringing it to a strength of four.

News provided by Sandy Corbett, Fleet 40, Tomales Bay, shows there must be at least 40 Flying Scots in California. Three of them are now for sale. I believe this is a historic time for Flying Scots on the West Coast. Expensive boats and slip charges are driving many away from the big-boat California lifestyle. A West Coast Flying Scot Winter National – 1993 or, at the next ‘Cup defense year, 1995 – that’s not too extreme to dream, is it?

P.S. The “debut” of the Flying Scot class in Southern California would not have been such a success without Harry and Karen Carpenter, who arranged for and financed the Boat Show space. Likewise, I thank my wife, Helga, and son, Marty – ever my loyal crew all these years, who came down after their regular jobs, and proved thru their example that she really is a great family boat!

MARCH/APRIL
TURKEY DAY REGATTA

Ryan and Kimber Malgram

At five-thirty in the morning my wife, Kimber and I pushed away from the dock at the University of Washington. It was November 24, it was cold (mid-thirties), and we had eight miles of upwind water between us and the race course.

"How you doing?" I asked Kimber. "Fine," she replied, not sounding enthusiastic. From the sound of her voice I knew that she could use some cheering up. "At least it isn't raining," I said, trying to sound optimistic. She didn't answer. I had a feeling she wasn't smiling, but it was still too dark outside to be sure. I was beginning to think that the Renton Sailing Club had intended a double meaning when they dubbed this event the Turkey Day Regatta.

Then it started to rain...

HOW WE GOT INTO THIS MESS

Kimber and I moved out to Seattle from Chicago two years ago. We love it out here. We've met some great people and have done quite a bit of sailing on everything from 420's and Lasers to a 48 foot C&C. I was even lucky enough to crew for Seattle's top Thunderbird skipper, Grant Chyz, for a season. (Grant won the '81 Thunderbird Worlds in Ontario!) But despite all of the wonderful sailing we've enjoyed out here and the variety of boats — I still find myself defending the Scot class, trying to explain to others about what a competitive yet fun group (fun and competitive are not synonymous in most classes) of people Flying Scot sailors are. And how much I miss sailing in the Scots. But all I usually get in response is a grunt and a comment like, "Oh, you mean Flying Sidewalks?"

So when I found out a few Scots were going to conjure themselves up at an obscure event called the "Turkey Day Regatta" wheels began turning in my head. Now, I don't own a Flying Scot — but it just so happens that I belong to the University of Washington Sailing Club and THEY have a Flying Scot... sort of. You see, their Flying Scot was made by the now defunct Ranger boat company. I hope this doesn't offend any of you Ranger owners out there, but let's just say that I have always had a particular bias toward Gordon Douglass boats. But then again, as my grandmother always use to say (and still does): "Beggars can't be choosers."

Anyway, this poor Scot needed work. The previous owner kept the boat moored on Puget Sound year round and as a consequence there were barnacles on the bottom. Yes, that's right, I said barnacles. Also, the rudder had at least two inches of slop in it (it was held into the gudgeons by two rusty 1/4" threaded bolts). But first things first: there was bailing to do. Apparently the boat wasn't in great demand this time of year because it was harboring at least twelve inches of water and looked in danger of sinking in its own slip.

After bailing it out, and installing a 3/8" stainless rod for the rudder, I started looking for the trailer so that we could pull the boat out of the water to clean the bottom. But nobody seemed to know where that elusive trailer was. Finally, I called the commodore of the Yacht Club. "Sorry, that boat doesn't have a trailer," he said. So I told him all about the Turkey Day Regatta, and how it was at the other end of Lake Washington, and that we really were hoping to go, but... "Sorry, no trailer," he repeated. That's when I remembered the enormous outboard motor bracket on the transom. "Is there an outboard engine for —" "Nope. Sorry," he said. And that was that.

I told Kimber that we wouldn't be able to race in the Turkey Day Regatta. "Why not?" She asked. I explained that we had no means of towing or motoring the boat to the race course. "Can't we sail there?" She asked. I paused, picturing us stranded in the middle of Lake Washington without any wind; or worse, getting caught in one of the many gales that visit our area every winter. But then more pleasant visions came to mind as I contemplated a fifteen knot broad reach (both ways) with clear skies and the spinner up and hot chocolate with those little marshmallows floating on top and... "You're right, I said. "Let's do it."

THEN IT STARTED TO RAIN...

So there we were, beating into an extremely chilly Southerly wind, listening to the pitter-pat of rain on the deck. I was beginning to have second thoughts... and then third thoughts. I was just about to ask Kimber if she wanted to turn back when she cut me off, saying, "How about some coffee?" Before I could open my mouth, she was filling a mug with the miraculous steaming Columbian liquid.

Two cups of coffee later we were past the I-90 bridge and could actually see each other smiling in the dim dawn light. Kimber joked that the sun must have risen, because now it was greyish-brown outside instead of black. By this time we had seen wind shifts of 50 degrees and several gusts of 20 knots — followed by periods of nearly zero wind. This was Northwest sailing at its finest: living up to its reputation of being the region where they send cocky meteorology graduates with attitudes. But did we care? Nope. So what if it was cold, drizzling, hopelessly shifty, and... who cared? The coffee was hot and we were in a Flying Scot on our way to a regatta! "Weather be damned," I shouted, "get out the camera, we're having a Kodak moment!"

But nothing lasts forever, not even Kodak paper.

By eight-thirty we were getting near the Southern end of Lake Washington. The skipper's meeting was still an hour and a half away and I figured we had plenty of time. In any case, it was time to consult the old chart for the exact whereabouts of Coulon Beach Park, Renton — the regatta launch location for people who owned trailers. Kimber stared blankly at the chart for a few minutes, "It isn't on here," she stated. She was right. Whether or not the chart was outdated, or just plain inadequate, we will never know. But there was no Coulon Beach Park to be found on its bleak pages. We sailed toward shore and tied up the boat to a public access dock in Downtown Renton. I hopped out, figuring that surely somebody in Renton would have heard of Coulon Beach Park. Apparently our chart wasn't the only one who hadn't heard of Coulon Beach: the Renton police hadn't heard of it; the Seven Eleven clerk hadn't heard of it; the Chevron gas station attendant and his phone book hadn't heard of it, and...
Turkey Day Regatta
(Continued from page 14)

By now it was ten o’clock and some-
where there was a group of skippers hav-
ing a meeting.

We put the sails back up, and sailed
away from the dock... about one-hun-
dred yards. And then we stopped. The
water turned to glass. We didn’t move.
We didn’t say a thing. There wasn’t any-
thing to say, because there they were:
only half a mile away... two, four, ten...
little white triangles of Dacron were pop-
ing up and moving out into a bay area
to the East of us. They had wind but we
didn’t. By a cruel twist of fate mother na-
ture was going to force us to stand off to
the side in the doldrum bleachers while
all of those well fed, over sleeping trailer
owners were going to be treated to a
steady little 10 knot Southerly...

Again it was Kimber who became the
shining ray of optimism, as she pulled out
our only paddle and started padding.
“Don’t bother,” I told her, “we’ll never
make it.” “Don’t be such a pessimist,”
she scolded, and kept right on padding.
At first her paddling didn’t seem to be
doing much, but then I could feel a small
cool breeze on my face as she worked
the boat up to 1/4 a knot or so. That’s
when I noticed that our mainsail was
eased all the way out to the port shroud
and it was puffing! I brought it in a few
clicks and suddenly we were moving
again!

We made it to the starting line with a
couple of minutes to spare. There were
thirty or so boats all together — only four
of which were Flying Scots, but we didn’t
care. Nick, a fellow Scot sailor waved to
us and told us that we would be starting
with the Thistles in the second sequence.
Kimber and I waved back with big grins
on our faces. It was funny to think that all
of these people were just starting their
sailing day and we had already put in al-
most six hours on the water.

The wind was moving a little to the left
with two minutes to go, so we headed for
the pin... “How are we doing on the line
sight?” I asked Kimber. I was too busy
working with incoming thistles to keep
track of the line much less our fellow
Flying Scot’s. She didn’t answer. “How
are we doing?” I asked, a little sharper
this time. “I’ve gotta go to the bath-
room... bad,” she replied.

A HAPPY ENDING

I don’t know if it was because we had
already been sailing all morning, or if it
was because of Kimber’s dilemma (we
solve that problem after the first race);
or if it was the barnacles on the bottom —
but whatever it was, we got that old
Ranger moving along fairly fast and man-
aged to pull off two first places before
waving goodbye to our fellow Flying
Scoters and heading home.

But it’s not over till its over, and after
having drifted for a half hour or so on a
once again glassy Lake Washington, I
was beginning to wonder if it would ever
be over. But, as usual, my pessimism was
unwarranted as mother nature again gal-
lantly galloped to our rescue with a
sweeping Southerly which allowed us to
carry our chute all the way home.

Five-thirty p.m., exactly twelve hours
after our departure, we dropped the spin-
naker — preparing to pull into our slip.
Suddenly we heard the eerie roar of thou-
sands of cheering University of
Washington Husky fans who were root-
ning on their “Dogs” to another win in what
was to become a perfect football season
and a number 1 National ranking.
Life was great.

Parts ... When your boat needs a
part, Flying Scot® Inc. has it and we’ll
ship it within 24 hours! We also supply
covers, trailers, and other accessories
designed and built specifically for Flying
Scots. All Scot owners are automatically
on open account.

New Boats ... We build new Scots
to order and take used Scots in trade.

Repair & Refurbishing ... We offer factory repair or refurbishing for
your Flying Scot.

FLEETS IN

FLEET 11 - SANDY BAY YACHT CLUB, ROCKPORT, MA
by Jenny Montello

The Fleet 11 season will go down as one filled with fun and surprises. Under the excellent direction of Commodore Ken Wright, the club facility and racing was unequalled, although the wind and weather conditions did not always cooperate. In addition to a brief visit from Hurricane Bob, one of the biggest surprises came in a race which started as a drifter and ended as a squall. While the leader, Skip Montello (FS845) kept heading for the finish line (much to the dismay of this crew/author), Tom Kolterjahn (FS2265) and crew Betty Lynch were in close pursuit. The third boat was caught by wind and waves and turtled, while the other boats dropped their mains and headed for the Yacht Club. With every one (boats included) back onshore, it proved a good time to remember safety first.

RACING

Thanks to the motivation of Fleet Captain Dick Wilkinson (FS434/1), Sandy Bay Yacht Club shook off the winter blues earlier than usual by opening the season with a three race Memorial Day Series. Tom Kolterjahn won the series, exemplifying years of experience.

The June “Founders’ Series” traditionally has served as a gradual warmup, but with the commencement of racing in May, proved to be full of good competition. In one of the most exciting club races in recent history, the top four finishers, Ken and Peg Wright (FS471), Skip Montello, John and Holly Yasaitis (FS3262) and Tom Kolterjahn finished the two and a half hour long race within minutes of one another. June also had a string of seven races with six different victors, demonstrating the depth of ability in the fleet: 6/2 Marilyn Evans (FS2924); 6/8 Kolterjahn; 6/9 Wright, 6/15, 6/22 Montello; 6/23 Dick and Maureen Wilkinson; and 6/29 Jim and Margot Hintlian.

The three race Fourth of July series kicked off the competition for the Season Trophy, which also includes the July and August series. After the first two races, the Hintlian and Montello teams were tied with 2.75 points. Following the traditional “Chowder Day” at SBYC, the third race began, with the lead passing between the two boats. Finally, in a tacking duel in the next-to-last leg, the Montellos took the lead and held on to take the series.

The six race July series was won by Tom Kolterjahn. Despite missing his #1 crew (wife Linda) for the season, Tom trained a large supply of nieces and nephews for alternate crew. The eight race August series ended in a tie between the Wrights and the Montellos, with the tie-breaker going to the Montellos. This series included a race in rolling waves and dense fog, in which the enthusiastic spirit of Peg Wright convinced the Race Committee, and other die-hards to race. It was a lesson in how to keep the boat moving in light air, as the Wrights won easily. I later learned that their first lesson in a Flying Scot was by Sandy Douglass, on a similar light air day!

The Labor Day series brought the largest turn-out of the season, with the coveted “Sandy Bay Mug”, an ornate solid silver trophy, at stake. This year, the three race series tested all abilities, with the first race winds gusting over 20 knots, the second race a drifter, and the third a steady 10-15 knot wind. Typical New England weather! The varying conditions kept the competition tight, and going into the final race, eight boats were capable of placing in the top three. Montello 5.75 points; Wright 6.75; Steve Ouellette (FS314); Bernie and Ruth O’Brien (FS2618/9); of Art Bookstein (FS2444); Kolterjahn, Wilkinson, and Yasaitis, all at 10. Skip Montello finished first in the final race to win the series, Ken Wright finished third to take second place, and Tom Kolterjahn finished second to capture third.

END-OF-SEASON DINNER

Not to be out-done by their sailing abilities, the Flying Scot Fleet 11 puts on outstanding potluck suppers. Thehighlight is the end-of-season dinner, which is a good time for friends, family, and the Race Committee. This year, the “Ken Wright Trophy for Most Improved Skipper” was awarded to Dick Wilkinson. The Season Trophy was awarded to Skip Montello. On the lighter side, ‘gag’ gifts were awarded by the Fleet Captain. In addition to our own sailing season, this year was marked by the hosting of the Mallory Cup Area A Championship, thanks especially to the efforts of Ken Wright and Dick Wilkinson.

As I sit at the Mac, enjoying the view of the colorful autumn leaves (but trying to beat the deadline for the January issue of ‘Scots ‘n Water’), I reflect on the season with fond thoughts of the members of our fleet, and throughout the Flying Scot Association, who made the season competitive, but most of all fun. If you are in the Rockport area on a Saturday or Sunday between Memorial Day and Labor Day, bring your Scot and join us for a race!

THE MIDWESTERN DISTRICT
Jack McClurkin, District Governor

The Midwestern district consists of the states of Illinois, Wisconsin, Minnesota, North Dakota, Iowa, Missouri, and parts of Indiana.

The district ranks fourth in membership among the 13 FSSA districts with approximately 214 FSSA members. We have 10 active fleets, from the southern tip of Illinois to North Dakota, a distance of over 900 miles.

Several early Flying Scot fleets were established in the Midwest at Lafayette, Indiana (Fleet #2) and at Wilmette, Illinois (Fleet #3).

One of our fleets sails on the open waters of Lake Michigan, one on Green Bay, and the remainder sail on inland lakes.

Our district holds one activity each year, the district regatta. It is a weekend regatta held at a rotating site. We are planning for 1992 at Delavan Lake, in southeastern Wisconsin, 1993 at Ephraim in northeastern Wisconsin, and at Wilmette, Illinois in 1994. Our district regatta attracts 25 to 35 boats.

Dear Jack:

In the heart of central Illinois you will find Clinton Lake the state’s fourth largest with more than 4000 acres of water. There also you will find Fleet 135, an active fleet of 16 Flying Scots. The size of the fleet has more than doubled in the last year due, in no small part, to the encouragement of the Hartmans, Jerry, Mike and Steve.

(Continued on page 17)
FLEETS IN
(Continued from page 16)

Besides an active summer of competition, Fleet 135 is perhaps best known for its continued hosting of one of the countries most unique regattas THE GLOW IN THE DARK, or as its become to be known THE GLO. The regatta was host to more than 44 boats in 1991 from as far away as Florida and Texas. The regatta is a no-cost-to-entrants affair with some of the best food, drink and fellowship a Scot sailor can find anywhere. The regatta began with the hosts Hartmans inviting sailors to the lake and they, the Hartmans supplied food, drink, and trophies. Soon the participants began bringing specialties from their section of the country for all to enjoy. Texas people bring chill, East Coast bring clams or lobster, Wisconsin brats, Minnesota local beer etc. The Clinton Lake Sailing Association provides the racing committee and volunteers, along with Fleet 135 members, doing cooking, cleaning and host chores so that the Hartmans can now have more fun by not doing all of the work. The Glo is a great happening.

As the Fleet continues to grow we are sure that more and better competition on Clinton Lake is in store for Flying Scots everywhere to enjoy.

Regards
Dave Boyer FS #3617 Urbana, Illinois

Fleet 114 – Delavan Lake Yacht Club

“We the people” make up Fleet 114! Not the boats, racing rules and club regulations.

Ask any member, and he or she will tell you. The club is family-oriented and a nice place to relax, and to spend a day, a weekend, or the hot summer.

In 1992, the Delavan Lake Yacht Club will celebrate its 100 year anniversary, and we have activities for the whole family — sailing school, Friday night fish fries, Day Camp, and a strong social program.

The racing program has a friendly competitive atmosphere. We always have time for a beer or soda after two short races. Everyone is interested in helping his competitor sharpen his racing skills and speed up his boat with a new “go fast” gadget.

Fleet building comes natural, and we all like to talk about the fleet, the Club and the people, if you give us half a chance. In early spring, Chicago Yachting and Navigation has a loosely organized boat show, and Fleet 114 is there with a boat to promote the Flying Scot and Fleet 114.

After all the positive things are said, there is just one negative point to be made about Fleet 114 and the Midwest District — the sailing season is too short!

We look forward to welcoming you to Delavan Lake in 1992 for the Midwest Flying Scot District Regatta.

Flying Scot, Fleet #2 Lafayette Sailing Club

Flying Scot, Fleet #2 sails with the Lafayette Sailing Club from a very nice facility on Lake Freeman near Monticello, Indiana. There is a small harbor with a ramp and the boats are kept on trailers at the Club grounds. It’s easy to drive to the lake, hitch up your trailer, put the boat in the water, and go sailing. There are picnic grounds and a swimming area with sand bottom. We are adjacent to Twin Lakes Marina which provides restrooms and some other useful services, although they cater primarily to power boats.

Lake Freeman, unfortunately, is not an ideal sailing lake. It is long and very narrow with high banks on the western side and is home to a large number of power boaters. One consequence of this is that we don’t handicap boats for flying a spinnaker, since those who do rarely have an advantage in the shifty winds and choppy water. In spite of these drawbacks Lake Freeman is our home because it is close to the Lafayette/West Lafayette area where most Club members reside and there are no better choices in easy driving distance.

The Club was formally organized in 1970. From 1970 to 1975 the membership grew from 30 to 87 individual and family members. Current membership is over 100.

Races are held on Saturdays and Sundays from early May to September. No single class dominates numerically.

(Continued on page 18)
and the mix of boats has changed over the years. Flying Scots first appeared on the scene in 1972 and the Scot fleet grew to about 10 in the mid-eighties, with five or six racing regularly. Unfortunately this number has diminished in recent years as the active Scot sailors moved to big boats on Lake Michigan or quit racing for other reasons. There are now rarely more than two Scots in a race, although there is some indication this may be turning around. On the positive side it turns out that most of the other boats which now race have Portsmouth Numbers nearly identical to the Scot, so with one or two exceptions the small differences are ignored and all boats race against each other on an equal basis. This keeps the racing exciting even if only one Scot is racing.

For the reasons noted we have not held any Scot regattas in recent years. The Club does have regular social events including the Board of Governors Picnic, a Fall Banquet, and a Spring Callout Meeting. A Sailing School is taught each Spring. Another well attended non-racing event is the Moonlight Sail held one or two times each summer.

In summary Fleet #2 is part of an active sailing club and the racing is good except for the low number of Scots within race. We would welcome new Scot sailors who live in our area. If anyone has questions I can be reached at the address below.

1991 USF&G SUGAR BOWL “RACE OF CHAMPIONS”
December 28-29, 1991

This USF&G sponsored event, hosted by New Orleans Yacht Club, consists of the top sailor from each of the 24 yacht clubs in the Gulf Coast Region sailing a three race series at the end of each sailing year to determine a champion! The series was sailed in the Flying Scot class boat.

The first race conditions were medium with winds at 12 knots. Skipper Rod Stieffel with crew Charlie Merrigan of Bay-Waveland Yacht Club took an early lead and held on to win race 1. Steve Bellows of Pensacola Yacht Club followed with a comfortable 2nd. Scott

Sonnier of Southern Yacht Club finished 3rd followed respectively by Bill Ross of Pontchartrain Yacht Club, Don Brennan of Buccaneer Yacht Club.

The second and third races were sailed on Sunday, due to the Saints game being held Saturday afternoon. The conditions in the second race were light and

Twas the night before Christmas and all at this spot
Wished they were sailing their beloved Flying Scot.
Sugar plum nightmares kept us awake.
We passed the time thinking bout Delavan Lake.
O'er the mantle the stockings were hung.
With fond memories of the fleet Finally Flung.
The beautiful packages under the tree.
We wondered about what their contents might be.
A compass?! Some fittings?! A red protest flag?!
Things to foil tricks from McClurkin's bag.

From up on the rooftop we heard a big Thunk!

Like catastrophic failure of a centerboard trunk.
Then Santa called "Merry Christmas! Good Night!"
"Don't go left on the course when wind's to the right!"

GREAT RACING AT THE GREAT SCOT
October 12 & 13th

Light-moderate to heavy-moderate winds characterized good racing conditions for both days of this year's Great Scot Regatta. In the first race, a few lucky boats managed some excellent port tack starts to dominate the upwind leg. Whit Kendall, from Atlanta, was in that group and he finished first. Then, in the second race, he did it again. And in the third race - ditto. Rob Fowler crewed for Whit. The due slid to 5th and 4th on the second day, but it was enough to put them on top. In second place was Berkeley Merrill and Jay Kuebel with consistent 2nds and 4-1s plus one bullet. Kent "General Rascal" Irwin, just back from an exciting trip in Mobile Bay, liked to finish in 3rd and shot up to third. Kent's crew was Burt Denton, Jim Johnson, hardly recognizable in a new moustache until seen in his boat with daughter Sally Ann, obtained 4th place (in spite of a frustrating side-ways creep with his spinnaker). In 5th place was Neil Mathews and David Brown from Chattanooga. We had seventeen Fleet 118 participants this year - a very good local turnout. There were seven fleet members in the top ten finishers: Merrill, Irwin, Johnson, Hull, Hartley, Whikehart, and Graham. In the evening of the first day's race, the participants were richly entertained with fleet captain Wendell Hull's wonderful parchment awards presented in the finest Hullin script. This was followed by a video review of the day's race by North American champ Steve Bellows. He added a good mini-seminar on boat rigging and handling. It was entertaining, embarrassing and simultaneously interesting. There was a professional photo.

Acrylic covers last “Twice as Long”?... Twice as long as what?

Here are the simple facts:

A white acrylic cover lasts an average of 3-4 years, colored acrylic about 5 years. Our least expensive Poly Army Duck cover lasts on average of 7 to 10 years. Now that’s long! We know, because we’ve been manufacturing quality one design boat covers for over 20 years. And we make both acrylic and Poly Army Duck covers.

Acrylic covers are OK for light duty. They’re light weight and colorful but they won’t hold up to outdoor winter storage or trailing. And the dark colors hold heat which can cause serious damage to your boat.

Poly Army Duck covers are great for heavy duty service: winter storage, trailing and mooring. This heavier, long lasting fabric is available in your choice of three light colors.

Other manufacturers have imitated our cover designs but none has matched our outstanding quality. Our fabrics are finished to our specifications and we put more reinforcement at stress points than anyone!

So, when you’re ready for a new boat cover, choose the quality standard of the industry... a cover by The Sailors' Tailor.

The mountain setting and the Fall Season make Smith Mountain Lake the prettiest lake we sail on. This continues to be a strong Flying Scot Regatta with 23 Scots registered this year. We had boats in attendance from Smith Mountain, Lake of the Woods, West River, Lake Norman, Lake Townsend and Carolina Sailing Club.

As we left home on Saturday morning, we were very concerned about the weather. A cold front was forecast to sweep the Virginia mountains later in the day with rain and high winds. Some of the Carolina District’s more memorable blow-outs had occurred at Smith Mountain with the arrival of October cold fronts. In one past regatta, 12 Scots, in-
SAIL SMART... AND WIN!

Still guessing which is the favorable tack and the favored end of the starting line? Get a jump on the competition with the race proven Winners Circle Calculator. Waterproof, color-coded six inch diameter calculator quickly determines best starting position and fastest course to the mark. Also shows fastest spinnaker angles. Reverse side contains commonly used racing flags in color. Only $9.95 plus $1 shipping. Massachusetts residents add 5% sales tax. Send check or money order to:

Regatta Gear, P.O. Box 99
Cohasset, MA  02025

At the Flying Scot 30th Anniversary Regatta in 1987, local teenager Danny Irvine, with Dad “Big Don” Irvine as crew, topped an extremely competitive 72 boat field. Harry and Karen Carpenter finished second in the event but first in the inaugural Wife-Husband National Championship, which was held in conjunction with the anniversary regatta. The Irvines and the Carpenters were followed in order by Marc Egan, Ralph Manee, Steve Bellows, David Neff, Ira Cohen, and Jerry Hartman. Rick Baugh won an award for “The Worst Race of All Time”, which included a premature start, three 720’s, two capsizes, and one hit mark — all in the qualifying race for the Champ Division (he didn’t make the cut, but he did finish — about 25 minutes after the next to last boat.) Sandy Douglass and Eric Ammann hopped a ride from the dock to a spectator boat, but there just wasn’t enough time to drop them off before the start, so they wound up racing and winning first place crew trophies in one of the Challenger divisions. Sailing World magazine was there too, although it was still called Yacht Racing and Cruising at the time; the festivities were captured in a feature article later that fall. Well, we’re going to do it again! The 35th anniversary of the FSSA will be hosted by Flying Scot Fleet One and the Cowan Lake Sailing Association, near Cincinnati, Ohio, with a special regatta on June 27th and 28th, 1992. A portion of the event will also serve as the 1992 Ohio Districts, so a large turnout is absolutely guaranteed. For those of you who haven’t yet experienced big fleet racing on a wee midwestern “pond”, Cowan Lake offers something special. The central racing area is only 3/4 mile long by 1/2 mile wide, and the surrounding wooded hillsides create big windshifts on a somewhat random basis. (Sail that lift up to about 5 yards off the big oak, tack over toward those picnic tables, but watch out you don’t get caught in the windshadow behind that little patch of trees, Oops.)

Regatta features will include good camping overlooking the lake, a complete Friday through Sunday meal package, a famous Fleet One Pig Roast (and chicken barbecue), entertainment including a campfire session (probably with a loud and silly contingent from Fleet 37 in Columbus leading us as we dance and sing “Help Me Rhonda”), numerous trophies and special awards, lots of Fleet One hospitality (baby-sitting service, charter boats, reserved parking for vans from Illinois farm country, free beer, etc.) Make your plans now to come back home to where the FSSA was born in 1957. See you at the 35th!!
Pete Merrifield and Steve Bellows win the 1991 Flying Scot North American Championships

Forest Rogers and Melanie Dunham place second in the Challenger division in the 1991 Flying Scot North American Championships

Harry and Karen Carpenter win the 1991 Flying Scot Mid-Winter Warm Ups, and placed second in 1991 Wife and Husband Nationals

Schurr Enough...you too should be sailing with Schurr.

MARCH/APRIL
shift was to the right. Dave Batchelor had worked the right side and was first after the second upwind leg with the Lewises a close second.

Dave led until the Gybe mark. Since the second reaching leg was tight, we all dropped spinnakers before rounding. As he rounded right to cut us off, a gust hit causing Dave to broach momentarily. We had just enough warning to ease the sails and flatten the boat. The gust started us on a plane through Dave’s Leeward side back into the lead.

We barely managed to cover Dave on the last upwind leg. The Lewises won by only a couple of boat lengths with Dave Batchelor second. Bob Post came on strong to finish third. Baxter Gordon held on to fourth with Gary Werdon finishing fifth.

The fleet was very aggressive during the start of the second race. There were moans and groans from some and cries of joy from those of us who were buried as the race committee signaled a general recall. Since the general recall moved our start to the back of the line, Dave Batchelor went in to replace a blown out batten. He did not get back in time to set up properly for the second race.

We did manage to get a good start during the second start of the second race. We went left again, tacked and crossed the fleet to round the windward mark first. Bill Ross and Bob Post rounded second and third. The race committee had improved the reaching angles so that the spinnaker could be carried on both reaches.

As we started back upwind we noticed that Bob Post, who was now second, was going faster. We had the vang on heavy and were hiking as much as possible. Bob had almost caught us as we neared the Windward mark. He was going very fast in the heavy air. We got a break when we were able to round the windward mark in front of a group of Day Sailors. Bob rounded in the middle of this pack of boats. We were able to add some distance to our lead as Bob had to fight his way through the Day Sailor fleet.

The Lewises finished the second race first with a charging Bob Post second. Bill Ross who had been over early during the first race finished third. Margaret Carson and Bill Sanjour sailed their usual solid heavy air race to finish fourth. David Batchelor managed to recover from his bad start to finish fifth.

We had enjoyed two great Saturday races with steady winds in the 10 to 20 range. As we prepared for V.I.S.A.’s usual outstanding social and dinner, the temperature was still in the seventies. Where was the dreaded cold front?

After dinner, the cold front made its appearance with lightening, thunder, rain and more wind. As everyone made a dash to the campsite, they had to dodge flying acorns along with the rain.

When we woke up on Sunday morning, the rain was gone, but the temperature was in the mid-fifties and it was blowing 15 with gusts to 25. The race committee postponed the 9:30 start when they found gusts of 25 to 30 on the water.

With the high winds and cool temperature, most of the sailors did not wait for a final decision by the race committee. By the time the race was officially canceled at 10:30, most of the boats were already on trailers and packed for home.

The Glow In The Dark Regatta

The 1991 “Glow” was well attended this year with 42 boats from all over the United States. For those of you who haven’t been or haven’t heard of this event – let me relate its history.

Back in 1983 the Midwest Districts were to be held in the upper part of the district, however the lake was closed to all boating at the time they were scheduled. It was decided within this fleet to cancel the District Championships for the year. Mike Hartman, Steve Hartman and Jerry Hartman being well traveled Scot owners and racers decided that they could hold a Districts at their newly made lake (although they believe the lake was built for them, Illinois Power Company actually built the lake to cool off their new Nuclear Power Plant). Phone calls were made, a flier was printed and mailed and things were set for the last weekend of September.

The Hartmans were so excited since for many years, even club racing meant a three hour - one way drive (after all, no point in just the three of them racing against each other). People were actually going to come to Clinton Lake to race!! Each one of the guys took a third of the planning, food was Steve, beverages and entertainment went to Mike, and Jerry handled the trophies and tee shirts. They then formed committees of their wives and girlfriend (me) to help. The regatta went off great and everyone seemed to have a wonderful time. The only problem that came up was that there was a registration fee. This problem was not from the registration people, it came up at the meeting after the regatta had been held...who kept receipts??? There had been no budget planning...They all individually had spent more than the total of the registration total...They all didn’t want the money...It was the best party that they had ever thrown...Let’s do it again next year only we can’t call it the Districts...

During the course of the next nine months, many meetings (usually luncheon meetings that included beer and went through happy hour) it was decided to call the regatta “The Glow in the Dark” and that there would be no registration fee.

The first annual “Glow” was held the last weekend of September 1984. Thirty two boats came. A great deal of fun was had by all participants but the three people that enjoyed it the most was the Hartman boys. Each year it’s even more fun for them.

(Continued on page 23)
Sometime, in these years, a tradition was started (I believe by Jim Cavanagh and John Clark when they brought live Maine Lobsters) that the racing participants would bring either a specialty food or beverage from their area. This tradition has made the food at the Glow a virtual smorgasbord of delicacies from across the U.S.A. It is not unusual for to serve fresh shrimp appetizers, Homemade Texas Chili, Wisconsin Brats, and for dessert hot apple pie from Door County Wisconsin. Many, many other area specialties are brought.

Another tradition is, that no one knows how they are doing during the three race regatta. The crew draw blind into a black spinnaker bag to get the color chip for four divisions.

There are two starts for the three races (much the same as the qualifying series at a nationals) no results are published, either at the end of the day, the end of the regatta or in Scots 'N Water. The top six boats (usually the sailmakers, boat builders, and heavy duty racers) are elevated out of their color divisions and given trophies and then the color divisions are given trophies to third place. (Crews trophies are just as nice as the Skippers, sometimes better.)

The 1991 "Glow" went well, the Hartman boys, I think had more fun than anyone else, (although perhaps Florence Glass was a tie). This year's Glow is the last weekend in September. Give one of the Hartmans a call if you are free that weekend.
The Starting Line

April 11-12th 1992
Fleet 127
Harbor Island Yacht Club
Old Hickory, TN
Nestled in the rolling hills of middle TN, just 25 miles upstream from downtown Nashville. Private facilities, complete clubhouse (kitchen, showers, etc.). Ramp and hoist launch. Well maintained camp sites, nearby hotels and restaurants.

August 1-2, 1992
1992 EPHRAIM REGATTA
Dear Fellow Flying Scot Sailors,
The Ephraim Yacht Club invites you to be our guest at the 86th annual Ephraim Regatta. The tradition continues – friendly and competitive Flying Scot sailing in beautiful Door County, Wisconsin!
Join us for the weekend of August 1-2 or make our regatta the centerpiece of your family visit to the finest vacation destination in the Midwest. We expect a fleet of over 25 boats to compete for the usual plethora of silver: five separate trophies, including the Wisconsin Cup. Don’t miss this opportunity to acquire some local knowledge for the 1993 Midwest Districts, which we will host. And don’t forget our famous Bratfest – all the beer, bratwurst, and fresh roasted sweet corn you can handle!
Our regatta is a bargain. Registration is only $15 per yacht, $10 if you pre-register at least 1 month in advance and includes complimentary coffee and donuts for everyone on Saturday and Sunday mornings. The Bratfest is only a few dollars per head, all-you-can-eat.
And Ephraim is not far away – 3 hours from Milwaukee and 4 1/2 hours from Chicago via I-94, I-43, Highway 57 and Highway 42.
Once again this year, EYC members will open their homes to provide free lodging to out-of-town racers. Please call in advance to arrange for a place to stay. We are looking forward to getting to know you better! For other lodging or camping information call the Door County Chamber of Commerce at (900)

52-RELAX.
Please be our guest for what promises to be another outstanding and memorable Ephraim Regatta!
Yours in Wind and Waves,
Please Contact: Jay Lott, Publicity Director, before May 13:
(312) 944-3156
After May 13: (414) 854-4071

September 5th & 6th
Labor Day Open
Lake Norman – Charlotte, NC
Another big North Carolina Fleet of Scots. Come and have fun with Entertainment, and stay over for Labor Day R & F.

Watch for more information regarding this very well attended competition!

1992 BACN CIRCUIT BEGINS

The 1992 BACN Circuit is about to begin, folks. And after a close finish in 1991, we are expecting to see even tighter results this year. For those of you who don’t know, the BACN Circuit started on the FYC porch with Neil Matthews, Rob Fowler and Jim Brown. They figured that a great way to increase participation was to try to combine several of the fleets that are near by. There is a rumor that they were also just looking for an excuse to change party. Fleet 111 in Atlanta, Fleet 118, in Birmingham, Fleet 13 in Chattanooga and Fleet 127 in Nashville are all about 2 hours away from each other. So it is a short drive to support the regional Scot sailing here in this part of the Southeast.
The way the Circuit works is that each fleet hosts two major regattas a year as part of their regular schedule. To be scored you have to participate in at least one regatta in each of the four cities. Birmingham, Atlanta, Chattanooga and Nashville (BACN). If you sail in more than one of the regattas in a city, you take your best finish. Low point scoring applies. Totals at the end of the season determine the Circuit winner.
In 1991 there were six boats traveling a lot between all of the cities. But at the last regatta of the year, only three boats had qualified. The finishes were real close and the end year results were decided on the last race of the last regatta in Birmingham. When the final tally was counted, Whit and Lisa Kendall finished first overall with 5 3/4 points, barely beating Berkeley and Nancy Merrill who had 6 points. Neil Matthews finished third with 14 points overall.
This year the competition is going to really heat up. Fleet 13 has been offering cash prizes to the winners of their winter training clinics, and they have been modifying their centerboards looking for a real edge. Fleet 118 has been importing ringers from the Pensacola area disguised as dentists. Fleet 111 has signed two free agents from Chattanooga and has almost doubled the size of their fleet over the last two years. And Fleet 127 has some “Young Guns” who have been out in all sorts of weather trying to practice, along with an old veteran who just came from Richmond, VA. A lot of the competitors have bought new sails and have been working hard on their boats getting ready for 1992. And there has been talk of extending the Circuit to Montgomery.
All you have to do to participate is bring your boat down to the lake. We can always find you a crew. If you have a Scot in the Southeast and you are looking for some great action, call up your regular crew or a neighbor and come on out and sail. The first regatta is the Atlanta Yacht Club Invitational on April 25-26, if nothing else, they have a great tradition going on and a great party as well.
Whit Kendall FS #1790

TJ SAILING SPECIALISTS

In Stock: NEW SCOTS with our custom oar handle, cunningham, vang, and jib sheeting; adjustable universal hicking stick. Add our WACO type 360° centerboard control and custom spinaker gear for a "kind-to-the-crow", race equipped SCOT. MAJI rigged SCOTS have won several NACs and fleet championships (and everyone knows it's the boat and not the crew or sails).

Previously owned SCOTS: All with MAJI warranty. Call or write for details.

Parts and Equipment in Stock: All the parts for DOUGLASS or CUSTOMFLEX boats as well as WACO type 360° cleats, crew hicking aid, shroud and tiller covers, custom cockpit "tent" covers, stainless or aluminum winch cranks, sailcloth centerboard gaskets, windvanes, plus all the necessary kits to update the rigging for your mainsheet, jib sheet, vang, and spinaker controls. Instructions and photos. Catalog available.

Check your Gooseneck! We have all the parts to repair the STAR MARINE/KENYON gooseneck. Our uncollapsible universal replaces the inadequate universal which appeared beginning about 1971: $9.50

Accessories: DOUGLASS GILL boots, absolutely the best wet sailing dinghy boot; CHUCK ROAST jackets and jumpsuits; HIGH SEAS foul weather gear; EXTRASPORT pads, ACCUSPLIT racing timers, at $43 the slickest waterproof watch/count-down auto reset stopwatch you can buy; SILVA compasses, and much more. Call us for holiday or birthday shopping suggestions.

New Items: HARKEN HEXARATHCET® rigger, form-fitting molded black plastic platform. No maintenance alternative to wood block to wedge ratchet up to horizontal. Leeward cleating is easy in the heaviest of winds! Now no excuse for cumbersome across-the-cockpit sheeting. $33 package has 2 rackets, fasteners, HARKEN 4150 cleat wedges, and instructions.

Boat Hoist: Aluminum "A" shaped hoist, lifts four feet, unrestricted width, 1900 pound capacity, adjustable bunk systems for SCOTS and most other monohulls (we have a catamaran model too), tie-down system, anchor system, shipped partially assembled by common carrier or completely assembled on your SCOT trailer. Call or write for more details.

We ship daily by UPS. We repair hulls, centerboards, sails, and straighten masts.
