From the President
by Dan Goldberg, FS 4991

The 1990's have not been a good decade for boatbuilders. A number of closdowns and takeovers have occurred throughout the boat building industry. Our boatbuilder, of course, is Flying Scot Inc. They used to build well over 100 boats per year in their heyday. But now the number is more in the 50-range. So it's really important for us to support our builder in every way we can. A strong builder is essential to the health of the Flying Scot Class.

Don't let the "Inc." in Flying Scot Inc fool you. It is not a corporate conglomerate. It is a small private company run by Harry and Karen Carpenter. We are not talking fancy-suit slick-talking salesmen, either. Harry and Karen are as modest as they come and are about the most down-to-earth and helpful people I've ever met.

In my professional career, I have dealt with many suppliers who are routinely unreliable. Either the product is shipped with deficiencies or shipped late or both. By stark contrast, my experience with Flying Scot Inc. is exactly the opposite. Every boat I have ever bought was delivered defect-free, on time, and rigged exactly as I specified it. One boat was a "rush" job and I still don't know how they built it so quickly. Flying Scot Inc. has also provided in-the-field repair work (to the extent practical) for my boats at major regattas. In short, they are about the most customer-service oriented people I've ever dealt with.

As members of the Flying Scot Sailing Association, it is in our best interest to fully support Flying Scot Inc. to our maximum ability. We need to have a reliable builder. We need to have a builder to perform repairs and supply spare parts. Most of all, we need to have someone to continue to build Scots to maintain the value of our boats and to continue the proliferation of the Class.

So if you bought an old Scot as a "starter" boat and are thinking of an upgrade, please strongly consider a new boat rather than a used boat. It is a good investment, as Scots retain their value quite well. If you need spare parts, call Flying Scot Inc. rather than Sears. If you need repairs, drop off your boat at their factory in Deep Creek, Maryland, and you will be amazed at the quality of the work.

The repairs to Mid-Winters damage on my ex-boat bordered on the miraculous. If a friend is thinking of buying a Scot, direct them to the factory or give them the toll-free phone number (800-864-7208) or their web site address or e-mail number, listed in the Flying Scot Inc. advertisement elsewhere in this issue.

It behooves us all to maintain a strong builder.

Letter to the Editor

Re: Scots'n Water

As a small boat rigger and sailor/racer for 65+ years, and a Scot dealer and owner for 15+ years, I am embarrassed to have jammed my main-halyard winch-wire on its spool yesterday, as many others must also have done. To get the sail down I had to cut the halyard; later I laboriously unwound the wire down to the jamb, cleared it (having to use considerable force), unrigged the boat and installed a new 52' 1/16" wire halyard.

Fortunately my problem occurred as we were returning to the club dock, and the wind was light, but it is easy to imagine other circumstances in which such a jam would be serious.

Excuse me "Sandy" (a good and long-time friend), but why cannot the Scot have a conventional main halyard with rope tail, made fast near the gooseneck to a halyard hook or cleat? It would be much quicker, safer, and cheaper to replace. The Scot could (should?) have such an improvement, but as of now I assume it is not allowed by class rules.

The job halyard winch/reel has been less of a problem in my experience, and of course is useful for rig-tension adjustment.

Dick Besse
"Scot Everything"

Fleet 43
Skaneateles, NY
It was November 15, the last day of a long, tiring, but wonderful tour of China. Our legs were weary after nearly 3 and 1/2 weeks of trekking, from the Great Wall to the Yangtze River to Hong Kong and finally Shanghai. We had been on lots of boats—a cruise on the lake at the Summer Palace in Beijing, five days on the Yangtze, the scenic Li River cruise, the Star Ferry in Hong Kong, a trip on the Grand Canal in Suzhou. Little did we know that one more adventure in a boat awaited us.

Some in our group chose to spend the afternoon packing or picking up those final souvenirs for someone back home. But our American guide told us that he would be going to the big department store downtown, the "New World", to have lunch and stroll around. Anyone was welcome to join him. We could catch up on our rest on the flight home tomorrow, right? Right!

The New World is nine stories tall with a central atrium flanked by escalators. The crowds were incredible like the day after Thanksgiving at a shopping mall in the U.S. We filtered through and boarded the escalator to go to the food court on the top floor. Finally relaxing and looking around as we rode up, we gazed down to the center of the atrium and what did we see? A Flying Scot!

For a moment, I thought I must have passed through some strange time-space warp. But Jim quickly remembered an article in Scots'n Water about a request for a boat for display in a Shanghai store. A brand new Scot just happened to be available in San Diego, so it found its way to China.

Our guide told us it had been displayed all summer. He convinced us to trespass onto the boat for a photo at the tiller—and was able to snap just before a floor attendant shooed us off. A great capstone for a great trip!
NEW Things are Happening at
FLYING SCOT®
What could be NEW after 42 years?

NEW... FREE Ways to Order: Phone: 800-564-7208
Fax: 888-442-4963
E-mail: info@flyingscot.com

NEW... FREE UPS Ground Shipping on orders over $100 net and under 20 lbs. and under 50¢ in length.

NEW... Paint, Gelcoat & Hardware installed by the factory can bring new life to your old Flying Scot. Or, for the ultimate in refurbishment—trade it for a new one.

NEW... Lower Prices on many items from Harken, Ronstan, and others that sailors like most. Support your builder by ordering what you need for your Scout from the people who know it best and feel good about the prices you are paying.

NEW... Flying Scots Built to Order. Our factory team has attended every NAC since 1973 and every Midlants since 1979. We know how to rig a Flying Scot for everyone—from daysailer to national champion. Order your new Flying Scot rigged just the way you like it.

Aquometer Sailor II Compass & Mount...
Features large yellow course line and 45 degree red bearing line, along with an angle of heel indicator. Mount is molded fiberglass to fit the deck just aft of the mast and held in place by shock cord for easy installation. Price complete...

Plastimo Contest Tactical Compass and Mount...
2 1/4" card—read the horizontal surface for bearings. Read the vertical surface at the 45 degree rubber line, rack through 90 degrees and you will read the same number on the opposite tack's rubber line. Mahogany mount is held in place by shock cord for easy installation. Price complete...

Trailer Aluminum Trailer...
Lightweight extruded aluminum designed to keep the boat low for easy access while rigging. Overall width is 7 1/2" and features 2, 50 lb x 12" tires. Can be picked up at the factory or knocked down and shipped by truck (assembly required).

Stainless Steel Mast Sleeve...
Custom formed welded and polished stainless steel to reinforce the base of the mast. Complete with fasteners...

Rudder Lift System...
Features custom stainless bracket for lift line and shock cord to pull blade down and hold it down. Great for weed prone or shallow areas. Complete with fasteners...

Swim Ladder...
Telescoping, stainless steel, two-step ladder that stows flat to the transom. Stainless grab rail through bolts to deck. Low profile to reduce main sheet snatch. Easiest way to get into the boat from the water. Complete with fasteners. Ladder...

Mainsail Flotation...
For added security against turning or burying the mast in the bottom. No modification to the boat or sails required for installation. Weight approx. 2 lbs...

Webbing Bridle...
Lightweight polyester webbing is sewn on the boat and sails. Rolls up for easy storage in tender. Complete with stainless steel ring, bolt and shackle...

Flying Scot® Shirts & Caps...
Classic Polo Shirts with soft, 60% cotton, 40% polyester knit. Flying Scot logo embroidered. Sizes: S, M, L, XL, XXL. One Size Fits All...

Spinnaker Pole...
1.5" diameter pole with height adjust and fittings designed to snap on without using the continuous wire trip....

Motor Bracket...
Two-part bracket that bolts to the transom. Stand-off part stays with the engine so that the bracket can be repositioned when the engine is not installed. Yoke that bolts to the transom is cast aluminum and the stand-off part is stainless steel with a hardwood board for the engine clamps. Complete with fasteners and template...

Ronstan Fixed X-10 Tiller Extension...
40" fixed length black anodized aluminum tubing with black nylon grip and rubber ball end. Urethane universal joint offers unlimited movement and unique fixed or snap-on snap off mount. Complete with bolts...

Ronstan Telescopic X-10 Tiller Extension...
29" to 48" telescopic, same as Fixed X-10 above with twist-lock adjustment. Urethane grip on outer tube and ball end on inner tube, and urethane universal joint. Complete with bolts...

Bow Flotation Bag Kit...
Reserve buoyancy to help keep the bow of a swamped Scout up and aid in rescue. Kit comes complete with mounting blocks and hardware. Gelcoat and/or resin not included. Price complete...

Transom Port 4"...
Aids in rescue of swamped Scout by allowing water to drain through transom while the boat is towed. Complete with screws. Lumber hole saw available...

Jiffy Reefing Kit...
Hardware and line for a single 3.6' reef reduces mainsail area by about 25%, but does not require you to remove the bottom head. (Modification to main sail and reef grommets not included.)...

Flying Scot® Inc.
Prices do not include shipping. Maryland residents add 5.5% sales tax.

The 1999 Wife-Husband National Championship
June 19 & 20, 1999 • Lake Carlyle, IL
by Felicia Bamer

The thirteenth (13th) annual Wife-Husband National Championship will be Saturday and Sunday, June 19 and 20 in Illinois at Carlyle Lake at the southern tip of Eldon Hazlet State Park. Join FS Fleet #83 on Friday, June 18 for dinner by the lakeside.

Midwest's finest, Carlyle Lake, is ten miles by three miles in the heart of corn country. Carlyle Sailing Association's facilities are top notch with three hoisting cranes, one ramp, three lengthy docks totaling 400 feet, a large pavilion, newly renovated children's play area, an air-conditioned clubhouse, showers in the restrooms, and a harbormaster living at the facility. The racing area is just outside the protected harbor and viewable from shore. For these June longest sun days of the year the winds are typically moderate (5-15 mph) with temperatures in the high 70's and low 80's.

Besides a wonderful place to sail, food including "Fried Turkey" will also keynote the event. A special Saturday evening of music and "gifts" are on the agenda.

The perpetual trophies for the event include the "Charlotte and Greg Fisher" for first in this National Championship; the "Cal and Anita Hudson" for first in Challenger Division; and the "Eric and Mary Ammann" for the First Century Division.

Housing accommodations include motels - in Carlyle (nine miles) for $35.00 per night or in Greenville (20 miles) for $50.00 per night; Bed and Breakfast; and camping about one mile from CSA within Eldon Hazlet State Park. The park has walk-in tent camping as well as over 500 electric hook-up sites that allow motor homes. New cabins overlooking the lake will also be available.

**NO CAMPING OR PETS ARE ALLOWED IN CARLYLE SAILING ASSOCIATION.**

1999 WIFE-HUSBAND CHAMPIONSHIP SCHEDULE OF EVENTS

**FRIDAY, JUNE 18**
7:00 - 9:00 pm  Registration
                Dinner at the Pavilion

**SATURDAY, JUNE 19**
7:30- 9:00 am  Breakfast
8:30 am        Registration
10:00 am       Competitors' Meeting
11:00 am       First Race Start
                Lunch (at RC discretion)
                Second Race
                Third Race
                Hors d'oeuvres and Beverages
7:00 pm        Dinner/Music/Surprises

**SUNDAY, JUNE 20**
7:00-8:30 am   Breakfast
9:00 am        Fourth Race Start
                Fifth Race (No race starts after 10:30 am)
11:30 am       Lunch
12:00 noon     Trophy Presentation

Please See Registration Form on the following page

Where We Sail

By Frank Gibson

The Capital District extends from Southern Pennsylvania to Southern Virginia, with the nation’s capital more or less in the center of the region. There are fleets in the vicinity of Philadelphia, Baltimore, Annapolis, Washington, Richmond and Norfolk. The District encompasses a wide variety of sailing venues and weather conditions. There is something for everyone in the Capital District, from working the shifts on a small lake to dodging thunderstorms and crab pots on the Chesapeake Bay.

The sailing season kicks off on the last weekend of April with Fleet 160’s Annual Regatta at Lake of the Woods. Lake of the Woods is a small lake located halfway between Washington DC and Richmond, and the Fleet there has been assigned number 160 to correspond with the average number of degrees of the windshifts on the water. Actually, that’s not true - if it were, they would be Fleet 360. But, even if the sailing gets a little frustrating at times, the folks there always throw a good party and put on a good event and it’s a great way to get the sailing act back together after the winter layoff.

May gets the regatta circuit into full swing. Fleet 163 hosts the Douglass Dinghy Derby at Lake Nockamixon near Philadelphia and Fleet 97 begins their season with the Azalea Cup at the West River Sailing Club on the Chesapeake south of Annapolis. In June, Fleet 42 sponsors the Summer Solstice Regatta at Selby Bay Sailing Center, owned by Bob and Mary Ellen Neff. As the season progresses, there are annual regattas at West River, Fishing Bay Yacht Club (Fleet 103) in the Southern Chesapeake, Miles River Yacht Club on the Eastern Shore of Maryland, and the Potomac River Sailing Association, where the action is watched over by a couple of stony-faced spectators - Jefferson and Lincoln. It’s not widely known outside of the Washington beltway, but both gentlemen think sailboat racing is marvelous!

As summer gives way to autumn, the Chesapeake Bay comes as close to perfection as a mere mortal sailor could wish for. The water is warm, the air cool, you’re surrounded by fall’s natural beauty and the winds are generally right in that window that your sails were designed for.

September is the month for the Capital District Championship, and it has, for the past several years, been rotated around the District, with generally good results. Our perennial champion is Peter Salmon-Cox, with secret weapon, June Schneider, in the crew position. The season finale is staged by West River Sailing Club with the Pumpkin Patch Regatta in mid-October.

The regattas mentioned in this article are open to all FSSA members. It’s a beautiful area in which to sail, so when you are making plans for next year, check our schedule and join us for a race or two. We’d love to see you (and so would Tom and Abe, though they’re not likely to say so).

MARCH/APRIL, 1999
Capital District Championship
by Frank Gibson

The Capital District Championship was hosted this year by Fleet 160, the Lake of the Woods Sailing Club, at Locust Grove, VA, September 26 and 27. Lake of the Woods is a man-made lake that supports a planned community just west of the Chancellorsville Battlefield, where Stonewall Jackson was killed accidentally by one of his own troopers, prompting one reb, so the story goes, to lament that "since the yankees can't whip us we decided to help 'em out by shooting our best General." Most of the sailors on the lake for Saturday's races could identify with that melancholy observation, as it was all too easy to beat yourself in the shifty and erratic conditions. However, our defending district champion, Peter Salmon-Cox, with spinnaker ace June Schneider as crew, refused to shoot himself in the foot, figuring correctly that the shoreline was the place to be and scoring bullets in two of the three races on the first day.

Sunday saw a significant change in the weather, with a frontal passage that brought in some welcome wind strength that, while still shifty, eliminated the flukiness of the day before. Salmon-Cox/Schneider proved to be just as tough in the new conditions, winning both of Sunday's races for a resounding first in the regatta. Frank and Debbie Gibson were second, with Hans Noordanus and Larry Huntsman in third. Congratulations to Peter and June for a repeat on the championship in a wide variety of wind conditions. At the awards ceremony, Peter revealed his secret. Turns out he grew up in Jolly Old England on a lake the same size and with the same wind characteristics as Lake of the Woods. That's a fine explanation for the lake, Peter, but what about winning last year's event on the Chesapeake Bay? They don't have one of those in the British Isles.

Kudos also to Lake of the Woods Sailing Club for organizing a very successful event. The race committee of Bob and Gail Post and Dick and Doris Smith kept things moving and had an uncanny (actually more than uncanny - to a superstitious person the word would be scary) ability to forecast the behavior of the wind. Commodore Hans Noordanus, in addition to demonstrating some hot boat speed on the lake, coordinated the shoreline activities as well, and Terrie Noordanus teamed up with clubhouse manager Marc Deitel to provide an outstanding Oktoberfest style buffet featuring bratwurst and beer (not necessarily in that order).

So with a great regatta behind us, we said goodbye to Lake of the Woods for another season. As we drove past Stonewall Jackson's grave, I felt some inexplicable urge to salute. I suppose it was an attempt to show some appreciation to the General for letting us race Scots on his battlefield.

Summer Solstice Regatta
by Bruce Pumphrey, Fleet Captain, Fleet 42

CONDITIONS
Both days were hot and humid with light winds (what a surprise). On Saturday, the wind started at 6-8 kts. from the northwest. Bob Neff set a windward-leeward course on the northern side of South River. As the day wore on, the wind was slowly replaced by a light bay breeze at 2-4 kts. from the southeast. Fortunately for the race committee, the change occurred between races 2 and 3. Into the afternoon, the light conditions were exacerbated by a 1-2 ft. chop caused by powerboat traffic. After the races on Saturday, the Sun-baked Corinthians cooled off with cold beer and snacks under the shade of Bob’s deck. Then they feasted on grilled marinated steak and chicken, as well as fresh salad and rolls, all prepared by Angie Pumphrey. The stuffed sailors all retired early.

On Sunday, the first day of summer, the conditions were perfectly appropriate for the Chesapeake: hot, hazy and humid. A light 4-6 kts. breeze from the northeast held on long enough to get the last two races in. The fleet was able to head in just as the powerboats began to parade out.

RESULTS
The sixteen participating skippers were allowed to choose to compete in either Championship or Challenger fleets. The split was equal with eight boats in each fleet. There was a common start for all sixteen boats. The skippers must have been well aware of their talent level since the Championship boats finished ahead of the Challengers in four out of five races! The lone exception was Mike Fannelo (512C) who finished fourth overall in the second race. Mike will not be allowed to choose Challenger next year.

Peter Salmon-Cox took top honors in the Championship fleet, posting three bullets and only eight total points. The Challenger fleet suffered some attrition overnight, but mustered four boats on Sunday. Roger Scherrerhofh squeaked past Fleet Captain Bruce Pumphrey in a tiebreaker, each with twelve points. Congratulations to all the skippers and crew who participated.

MARCH/APRIL, 1999
When the Going Gets Tough
by Frank Gibson

Well, skipper, got any bright ideas?" asked Debbie, my wife and expert crew, as she watched the spinnaker hang lifelessly over the forestay. This wasn't a question that required an answer, since I was obviously out of ideas, bright or otherwise.

Having read somewhere that the captain of the ship should at all times appear to be in control of the situation, however dreadful, I replied, "I thought about doing a wind dance, but that would probably violate the rule about getting around the course by means other than fair sailing."

This transparent attempt to mask my despondence with a note of cheery optimism failed to impress Debbie. "It's more likely that you're considering ritual suicide," she said, contemptuously of my feeble efforts at playing captain of the ship, "It's lucky that we left the sword on the beach."

She was close to the truth, although suicide seemed a bit drastic, at least for the moment. Sailboat racing is, after all, just a sport; an enjoyable way to pass a few hours communing with nature and exchanging pleasantries with one's comrades, isn't it? It isn't the sort of activity that one dispatches oneself over, is it? I mean, it's not like golf, is it? On this particular day, however, suicide was becoming an option worth considering.

In spite of myself I looked back, for the hundredth time, at the fleet behind me. THEY'RE CLOSER! Every time I took a peek, they were closer. Not much closer, mind you, but perceptibly closer, nevertheless. It was a slow and steady grinding away of the distance between us, a cruel version of a Chesapeake Bay water torture. How could they be closer? Their sails were slatting and snapping in the doldrum that had settled over us, just as mine were. Their boats were rocking and pounding in the power boat wakes just as mine was. So how could they be gaining on me? But there it was - every time I looked, CLOSER! I tried to imagine what Stuart Walker would be doing in this predicament. Surely he would find a wind-bearing cloud or geographic feature that would propel him to victory. It was, according to Dr. Walker, merely a question of maintaining a winner's attitude. I looked around. Nothing but unrelenting heat and stillness, and the inexorable march of the fleet toward my stern. No breeze from cloud or anywhere else broke that shimmering monotony, and certainly my baiting brain could conjure no positive winning attitude to dispel the aura of despair that had invaded our boat.

I turned my attention forward again, determined this time to keep it there, to focus on the finish. Alas, no relief from the gnawing anxiety could be found in that direction either. The finish line, that invisible savior that would put an end to this mounting panic, was NO CLOSER! How could it not be closer? We were making some headway in that direction, weren't we? I decided to check with an expert.

"Debbie, are we moving?"

"Probably, but not enough to tell in which direction." I ground off another layer of tooth enamel, and what was left of my mind wandered back to the beginning of the race.

Things had started well enough. It was day two of West River Sailing Club's annual Labor Day Regatta, and with two races to go, we found ourselves in second place, one point behind Dan Neff. Dan, along with the rest of the Neff clan, routinely turns the Capital District events into family sponsored clinics, so I was happy to be that close to him, even if it was by virtue of the fact that he had exchanged one of those pleasantries that I mentioned earlier, and did some penalty turns in race three. Never mind, I've never looked a horse, gift or otherwise, in the mouth. We were off in race four in a brisk southwesterly that lasted for at least thirty seconds, and then died. The rest of the race then became a brutal guessing game of avoiding the minefields of no wind that were everywhere.

At the start of the final leg, a downwind to the finish, I was still in sight of Dan, and the two of us had built up an insurmountable lead on the rest of the fleet. The conditions were laughable. The holes in the wind were like the famous Roach Motel - you could check in, but you could never check out. One misstep and it was good-bye, regatta. Halfway home, I had now made that fatal misstep, and as Dan disappeared toward the finish line, my insurmountable lead over the rest of the fleet had not only become surmountable, it was now tenuous.

Debbie jolted me out of the dream state that had become my refuge from the harsh reality of our situation. "Hey skipper, we're getting a puff here. How about disconnecting that autopilot you're on and see if we can mange to finish this marathon."

We did eventually finish that race, and, as I turned out, a second race that was no more fun than the first one. The final results are unimportant (if you have assumed that this statement is a clue to the final results, you are correct.) After it was all over, as we tied up at the club, Debbie crawled off the boat on all fours and kissed the dock. Fearing that she might be ready to abandon the sport altogether, I made some not very convincing observations about days like this being a necessary ingredient to an appreciation of the good days.

"After all," I said, "if every day were perfect weather and perfect sailing conditions, the sport would be too predictable to be of interest to anyone, and probably wouldn't exist."

"All well and good," she replied. "I'm not going to quit doing this because of today, but there's a bumper sticker out there that says 'When the going gets tough, the tough go shopping.' The next time you even suspect conditions like these, on your way to the boat just drop me off at the nearest mall."
Memories and Thoughts From Abroad

by Keith Seddon

FLYING SCOT MID WINTERS 98 - ARTICLE OR NO BOAT!
21:30 HRS. GMT 14.10.98 - DEADLINE IMMINENT

How is it that anyone who writes an article for 'Scots'n Water' is apparently under threat from one source or another? Is it because all serious aspects of Scot racing have been exhausted in previous issues to the point that we have heard it all before in different ways, or is it that people are just generally pen-shy? I suspect the former as I had to be bribed by the offer of a boat to write this article. I suspect the conversation went something like this... Editor's spouse - "How about Scot racing from a Brit's point of view? We have a couple of Limeys here this year. That could be a neat angle. We could trade them an article for a fast boat."

To come clean, I was introduced to Flying Scot racing by an old friend from Michigan State, one Paul Lee. We met in England in 1994 on the day that Paul had arrived in Hamble, Southampton having completed an epic voyage from Detroit aboard the 40-foot IOR yacht "O quest". During Paul's stay, of some two years we competed against each other many times on the water in IOR boats, Paul coming often a close second which cost him several bottles of French champagne and increased sense of humor loss. On his day of departure he said "Come race Flying Scots and see what true racing is really about. I'll whip your ass." Very willing to take a punishment, the following year I flew to Panama City for the Midwinter Regatta and crewed a Scot for the first time. Seeing Paul Lee close to the front of the fleet was a new and heartwarming experience for me and I was impressed by the venue, the camaraderie and also by the sheer amount of rain! all my sleeping bag could take aboard, impressed enough to return to helm a boat of my own in 1998. Quite a simple undertaking to the uneducated, but in reality it proved to be almost impossible. On talking to Paul some several months prior to the regatta he told me that there would be no problem in acquiring a boat to charter. He is a very optimistic kind of guy. A week before the regatta, endless phone calls of enquiry to almost every Scot District Governor had proved fruitless until a "fairy godmother" in the shape of Kerry Pebbles said "No problem, take one of my boats on a break it-pay for it basis". Kerry had come up with the goods and Thom Lee, crewing for me, trailed the resulting Scot from Detroit to Port Walton. Next problem was to get myself and Trevor, my other crew, from the UK to Port Walton. It appeared that every available flight into that area was taken by Spring breakers. We ended up taking a charter flight to Miami and driving across Florida. This in itself was quite fun except for the privilege of paying $120 on Alligator Alley to appease the local Sheriff for our enthusiasm with the gas pedal in order not to miss the first race. Some twelve hours later, in fact 24 hours from leaving the UK, we finally arrived at Port Walton and have since learned that many dedicated Scot sailors undertake the same length of journey, if not a longer one, in order to be there.

Dawn broke very soon after we had fallen asleep and we were introduced to our Scot who looked even more tired than us. Not to be disheartened we scrubbed her, rigged her, launched her and raced her, not especially fast but not actually the slowest. Sadly she had seen better days and was delaminating so badly in the hull that we felt as though we were sailing an inflatable dinghy without floorboards. We considered the prospects of removing the core and replacing with fiberglass but without Kerry's permission for such surgery and with insufficient time, we decided to stick with her as she was - after all it's not so much the winning as the taking part, right?

The following day we arrived at St Andrews Bay Yacht Club amidst some 70 other enthusiasts busily preparing their Flying Scots in all their glory. Was there a chance that St Andrews Bay YC could have a Scot that had not been entered? The fleet captain told us there was such an animal but also that she was considered unseaworthy. "We'll take a look" We thought and after jumping aboard without falling through her sole we considered her to be worthy of going to the ball - our Cinderella.

The first race as I recall was somewhat windy, some called it survival racing. Many competent crews spent lots of time swimming rather than sailing, so much so that the afternoon racing was cancelled. We however, probably more by luck than
judgement (and definitely not by experience) managed to keep upright and complete the race in what we considered to be a commendable eighth place. The next day the wind gods had been appeased and it was time for the sun gods to do their worst resulting in two races held back to back in nothing other than drifting conditions. The remainder of the regatta was sailed under fairly idyllic circumstances enabling all races to be completed to the allotted timescale. Thom, Trevor, myself and what had become known as "the green boat" either because of the hull's color or the sailing prowess of those within her, were competing in the Challenger division. The main tactics were to observe the starting directions of the top boys, "where on the line is Gregg Fisher starting? Is Graham Hall with him and where are Kelly Gough and Steve Bellows?" Whichever way they were going, we were going to follow ten minutes later on our start. This proved to be a fair strategy, often getting to the weather mark in the top three boats only to lose badly downwind as our Cinderella was a little heavy.

Overall I think we finished middle of the fleet at the end of the regatta feeling that we could probably have done much better in a newer boat. Many were surprised that the "green boat" had shown more pace than she had for several years which has given us much encouragement to race again in the future. Hence I am writing this article as Gerry Hartman has promised his boat to us for the next Midwinter in return for this contribution to Scots 'n Water. Returning to Panama City in 1999 is indeed no great hardship as it is without doubt one of the most friendly regattas I have ever had the privilege of competing in at any level. The camaraderie off the water, sense of fair play on the water, race organization and venue are to be applauded. Our huge thanks must go (and not necessarily in this order) to Paul Lee for the invitation, Kerry Pebbles for the opportunity, St Andrews Bay Yacht Club's fleet captain for his uncalculated loan of a club boat, Ellen Price and her team for the organization and Shelly Meadows (bar stewardess) for liquid subsistence (and subsidence!) and all Flying Scot sailors and crews who make the Midwinter an event worth travelling what seems like halfway across the world for.

As a footnote for the benefit of others like myself who do not possess a Flying Scot of their own, perhaps fleet captains throughout the States could consider making available for charter some of their Flying Scots thus encouraging other would-be enthusiasts and possibly boosting the coffers of their junior sections at the same time.

So there you go Gerry Hartman, my job's done. Get that hull polished, sails ironed and the rig set, we'll see you in Panama City, Florida for the 1999 Midwinter's.

---

Acrylic covers last "Twice as Long"?...
Twice as long as what?

Here are the simple facts:
A white acrylic cover lasts an average of 3-4 years, colored acrylic about 5 years. Our least expensive Poly Army Duck cover lasts an average of 7 to 10 years. Now that's long! We know, because we've been manufacturing quality one design boat covers for over 20 years. And we make both Acrylic and Poly Army Duck covers.

Acrylic covers are OK for light duty. They're light weight and colorful but they won't hold up to outdoor winter storage or trailering. And the dark colors hold heat which can cause serious damage to your boat.

Poly Army Duck covers are great for heavy duty service, winter storage, trailering and mooring. This heavier, long lasting fabric is available in your choice of three light colors.
Other manufacturers have imitated our cover designs but none has matched our outstanding quality. Our fabrics are finished to our specifications and we put more reinforcement at stress points than anyone else.

So, when you're ready for a new boat cover, choose the quality standard of the industry...a cover by The Sailors' Tailor.

SCOTS 'n WATER
Enthusiastic Scot sailors plan to celebrate 40 years of the Flying Scot at the Detroit Yacht Club by hosting a full weekend of racing, seminars, and partying Oct. 1-3 of this year.

This weekend promises much more than a typical regatta. It's meant to celebrate what may be the most successful match of club-owned sailboats and yacht club ever.

The DYC bought its first three Scots - hull numbers 97, 98, and 99 - in 1959, not long after Sandy Douglas first built the Scot. The boat proved so ideal in its role as a club boat that soon the DYC and its sister yacht clubs around the Detroit River and Lake St. Clair were buying Scots by the bunch.

Over the years, the DYC has bought approximately 65 Scots for use by its members. Counting all the Scots owned by Detroit-area yacht clubs with whom the DYC competes in races and other events, the number of boats over the years has numbered more than 100. Typically, the DYC will buy one new Scot each spring and sell the oldest one in its fleet. Today, the DYC owns 13 Scots, with another due for delivery in time for Midwinters this year.

The Flying Scot proved ideal as a club boat for the very reasons that Sandy Douglas foresaw. The boat is simple to learn, reliable, fun to sail, comfortable, yet capable of good performance in the hands of a top sailor. In short, for the varied demands placed on club-owned boats, which are used by novices and experts alike, the Scot quickly proved itself a winner.

So did the sailors who sailed it. From competitors like Bob Cowles and Hans Kuschnerus in the 1970s to Paul Lee in the '90s, DYC Scot sailors using their club-owned boats have scored in the top 10 at NACS, Midwinters, and other top regattas.

Our Scots see almost constant use. We race every Saturday from April through October. We teach novice club members how to sail during a summer-long sailing class on Tuesday and Thursday evenings. We offer an advanced sailing and racing seminar on Wednesday nights. And club members make extensive use of our Scots for pleasure sailing during the season.

Our sailing classes deserve special note. The DYC's learn to sail program has been one of the top attractions for new members joining our 1,300-member club. Each year, we instruct from 50 to 100

Continued on page 16
members in the art of sailing. Many go on to own their own yachts, and to participate in the annual Port Huron-to-Mackinac race and other top regattas.

To celebrate this proud heritage, the DYC will host sailors and their families for a weekend of racing seminars, fun races, and an awards banquet during the first weekend in October. Top-ranked Scot sailors from around the nation will conduct seminars aimed at helping sailors get the most out of their Scot. We'll host a series of races on the Detroit River and Lake St. Clair, part of the Great Lakes system connecting Lakes Huron and Erie. We'll throw a welcoming cocktail party on Friday evening and a black-tie banquet with a surprise speaker on Saturday evening.

The weekend is still in the planning stage, but watch for details here in Scots'n Water and on the DYC's Web page, www.dyc.com. We hope to see you there!

---

**Fast and durable sails at a great price!**

S
obstad Flying Scot sails come with all the "bells and whistles". They are made from the finest cloth available with radial corners, rocked panel construction, windows and everything you need to get the most out of your racing. We have applied the technology and materials that have made us leaders in other one design classes to the Flying Scot to bring you these sails at a very low price.

| Sails from the Sobstad one-design development center. |
| Full features, ready to race, highest quality materials. |
| Sails with a Sobstad race winning pedigree. |

Designing Race Strategy

by Hal Smith
Reprinted from SNAX, Sept. 1996

We must first be sure we share the same understanding of what strategy is as it applies to sailboat racing. Strategy is a plan for your race. Your strategy is your general account for the weather conditions, geographic conditions, competition, and your goals for the event.

It will help to understand what strategy is by identifying what strategy is not. Strategy is not: 1. Tactics (taking someone's wind, forcing a tack because of your rights, leffing, etc.); 2. Sail selection; 3. Boat and gear preparation; 4. Maneuvering skills; 5. Boat speed ability. These things are all tools to help you implement your strategy.

It is normal for sailors to complete a race without ever having a strategy. If you can develop a strategy for your race, you will have an advantage over all those who do not. Since nobody sails a perfect race, the winner is determined by the one who commits the fewest and least costly mistakes. A good strategy will help you avoid the big mistakes.

How then is a strategy designed? The oversimplified answer is to sail with your head outside of the boat and anticipate all of the variables around you, taking advantage of their predictable aspects. In order to accomplish this, we will need to categorize the various items which will be important.

All strategies begin with a goal. It is assumed the goal is to win the race. Therefore, a good strategy will cover the entire race from pre-start to finish. If your strategy does not contribute toward achieving your goal or does not cover the whole race, it is not adequate.

Part of your strategy can be developed prior to the race as it relates to analyzing your strengths versus your competitors'. This includes your sailing skills as well as your boat's abilities. Pre-race preparation of your boat and equipment plus boat handling practice will increase your options.

Implicit in the question of how to win the race is the question of how to get around the course as fast as possible. The answer is simply take the shortest distance with the fastest speed. This is generally a function of the wind. It is a great help to have some idea about the predictability of the wind variables. This is not a precise science. Part of this is knowing weather, and part is in having local knowledge.

Wind will either: 1) Oscillate back and forth in some reasonably regular pattern; 2) Tend to permanently shift to one side of the course; 3) Do none of the above. Normal influences on these events are major weather system changes, local geography, and the passage of the day. Armed with a check of the local weather forecast and your familiarity with the area and time of the event, you can make certain predictions before the race. To increase your accuracy, you must study the local conditions on the water before the race starts and as the race progresses.

If the wind is expected to shift back and forth (#1 above), you must get into phase so that you are always able to sail a lift without going too far into the corners of the course. You, therefore are trying to stay more or less in the middle of the course so as not to miss the next lift. If the wind is expected to make a permanent shift to one side, then you want to work your way all the way toward the expected shift as soon as possible. If the wind is in one of those none-of-the-above categories, then you have to be more on

MARCH/APRIL, 1999

17
continued from page 17

your toes and not the fleet get too far away, lest you get stuck with your own personal header.

Every sailing location has certain shore lines or geographic influences which alter the conditions. A specific area of influence may affect conditions differently as the wind changes direction or speed. This knowledge will help you plan the fastest route around the course by either sailing near or avoiding the area of influence.

If you are sailing in a strange location, you may recognize potential influences as being similar to ones you experience on your home waters. Take the time to sail around the area and verify your suspicions rather than take the word of the locals even if they seem to be offering genuine advice. Local conditions sometimes gain a certain unearned myth, and you do not want to be fooled.

Knowing your competition is also very important. You may not mind getting close to someone who is known for a high level of skill, but you will want to avoid novices who can foul you and take you out of the race with the leaders. Your competitors may have aggressive habits or reputations for speed which can influence how close you sail to them. If you are confident with your knowledge of the rules, your boat handling skills and boating speed, you may almost ignore your competitors, except at the start, where you will want to avoid any dumb moves made by some sailors.

Do not keep your head buried in your boat if you wish to design a good racing strategy. You must get to the race committee meeting early and know the instructions cold. You must get on the course early and make notes on the wind and other weather conditions. You must identify local geographic influences which can affect how fast you get around the start and anticipate where they will try to go. All of this requires that you have prepared your boat and crew and practiced all you maneuvers before race day, because experimenting with boating speed at this point will distract you from your race planning.

Your strategy must answer the question of how the race will be sailed. Having analyzed the wind, you should be planning to go up the middle, or to one side or the other. This is part of your strategy. Local knowledge will suggest advantages and disadvantages around the course. You may wish to avoid other boats or to stay close. Your relative boat handling and your knowledge of the rules can determine your aggressiveness at starts, mark rounding, passing efforts, etc. Simply identifying what will make a successful day will affect your strategy.

Your crew multiplies your ability to take in information and evaluate it, so crew should be involved in the process. They need to understand your boat’s strategy and its logic, so they can do their job better and help you update your strategy if conditions change.

The prescription for good strategy design is lots of sailing—just the kind of boredom I like. Have fun adding strategy to your racing efforts.

---

**Midwest Sailing**
SAILING SPECIALISTS SINCE 1963

NOW IS THE TIME TO UPDATE YOUR FLYING SCOT with custom rigging kits from Midwest Sailing: outhaul, cunningham, boom vang, jib sheeting, main sheeting, and spinnaker; crew hinging line; under-boom mainsheet loop; centerboard gasket. Easy to install. Complete instructions provided with each kit. Also available: stainless yachting cranks; telescoping tiller extensions; spinnaker poles; tiller, shroud and cockpit covers; the best mast-head wind indicators. Check your gooseneck, halyard winches and standing rigging; we stock replacements.

Same-day shipping for most Flying Scot parts, accessories and rigging kits.

A NEW MIDWEST SAILING FLYING SCOT is rigged with our custom boat handling systems. These rigging systems have been developed by our staff since 1967 to make the Scot easier, more comfortable, and therefore more fun to sail and race. Our Scots may not be faster but Midwest Sailing has for over 30 years provided our customers with the best rigged Scots available.

“PREVIOUSLY OWNED” SCOTS. Our used Flying Scots offer tremendous value. We thoroughly inspect every listed boat twice — once before listing and then before delivery. All necessary repairs (sails, centerboard, etc.) are then made so your focus can now be on sailing and enjoying your boat — not being a handyman. We have several excellent choices on hand, all with Midwest Sailing’s one year warranty. Call us today for our current listings.

BOAT HOISTS. Lake sailors, you can end bottom-washing and dry-sailing hassle with our aluminum “A” shaped boat hoist with custom-designed Scot bunk package. Lifts four feet, 1300 lb. capacity. Lightweight and low maintenance. Complete with tie-downs and bottom anchoring system. Shipped common carrier partially assembled, or pick up fully assembled on your Scot trailer.

SPECIAL SCOT SERVICES. We repair centerboards, do fiberglass repair, and straighten masts. Expert personalized instruction is available, whether learn-to-sail or race-to-win; one-on-one, or with your entire family or crew. Also fleet and club seminars.

SAILING SPECIALISTS. Midwest Sailing has many satisfied long-time customers throughout North America. We also sell and service Optimist, Sunfish, Laser, Barnett, Hobie, Interlake, Capri, and Hunter. Please call, fax or e-mail us for details and prices today.

WE SHIP UPS DAILY. VISA, MASTERCARD AND DISCOVER WELCOME.
Starting Line
Note: Please send all Regatta Notices to the Association Office

River City Regatta
April 10 and 11, 1999
Jacksonville, FL
For more information, contact Jon Hamilton at (352) 392-2999 or e-mail at Hamilton@DAVE.CBA.UFL.EDU.

Florida District Regatta
April 17 & 18, 1999
Mt. Dora, FL
For more information, contact Pete Smith at (407) 366-6636.

Great 48 Regatta
May 1 and 2, 1999
Lake Norman Yacht Club
Lake Norman, NC
Friday afternoon there will be a seminar held by Greg Fisher and Graham Hall. Two races will be held Saturday. After Saturday’s racing there will be a dinner and entertainment. Sunday’s racing will start early with one race allowing out of town competitors the opportunity to get an early start home.
For more information, please contact Linda Burke at (864) 963-9361 or e-mail at sjb@mindspring.com or Craig Milliken at (704) 663-0688.

Buckeye Regatta
May 22 and 23, 1999
Hoover Yacht Club, Fleet 37
Columbus, OH
The 1999 Ohio District regatta season kicks off with the 31st Annual Buckeye Regatta. The regatta will be held at Hoover Reservoir near Columbus, OH. Camping is permitted on club grounds where restroom and shower facilities are available. Hotel accommodations are also nearby.
For further information, please contact Susie Stombaugh at (614) 781-0302 or e-mail: stombaugh.8@osu.edu.

Gator Challenge
May 29 and 30, 1999
Jacksonville, FL
For more information, contact Jon Hamilton at (352) 392-2999 or e-mail at Hamilton@DAVE.CBA.UFL.EDU.

1999 Midwest District Championships and Egyptian Cup Regatta
June 5 and 6, 1999
Carlyle Sailing Assoc., Fleet 83
Lake Carlyle, IL
The doors will open Friday evening, June 4, and the sailors of FS Fleet 83 will organize an exceptional welcome party for all new and old out of town participants. CSA offers outstanding sailing facilities, great racing, food and partying. Warm up for the 1999 Wife-Husband Regatta hosted by Fleet 83 and CSA. An excellent camping ground exists in the State Park next to the harbor. Lake Carlyle is a 26,000-acre lake located 50 miles east of St. Louis, Mo.
For more information contact the Midwest district governor, Tom Pinkel, at (618)-632-0712 (E-mail: tpinkel@aol.com) or Bill Clark, Fleet Captain for FS Fleet 83 at (314)-878-3969 (E-mail: cclark@stnet.com).

Reggae Regatta
June 5 & 6, 1999
Lake Lanier Sailing Club
Atlanta, GA
Please join Atlanta Fleet 111 for the Reggae Regatta. Lake Lanier Sailing Club hosts this multi-class event. Over 100 boats are expected to participate and Flying Scots will have their own start. A great party follows racing, highlighted by an authentic steel drum band. Dry camping facilities are available on club grounds.
For more information and directions, contact Brian Bolin, (w) (770) 280-6327, (h) (770) 772-6168 or e-mail: brian.j.bolin@mci.com.

1999 Full Moon Regatta
June 12, 1999
Monmouth Boat Club
Red Bank, NJ
1999 New Jersey State Championships kicks off in Red Bank, NJ on Saturday, June 12th. The 8th Annual Full Moon Regatta, hosted by the Monmouth Boat Club, will be sailed on the beautiful Navesink River. Come test your prowess as five races are planned. We’ve had winds from 3 to 30 in recent years. EZ in, EZ out on three boats next to a historic landmark, the clubhouse. Skippers meeting is scheduled for 9:30 am.
For more information, contact regatta chairpersons, Bruce and Jackie Cattanach (973) 586-0825, or e-mail at bcattanach@worldnet.att.net.

1999 Wife-Husband
June 18 - June 20, 1999
Lake Carlyle, IL
This regatta is hosted by Fleet 83 and the regatta chair is Felicia Bamer.
Arrive on Friday, June 18 and enjoy dinner with a five race championship to take place on Saturday and Sunday.
Please look for the registration form on page 8.
For more information, contact Felicia Bamer at (314) 227-4187 or e-mail at mst3-f@rockwood.k12.mo.us.

(Continued on page 20)
1999 North American Championship
July 24 - July 30, 1999
Gulfport Yacht Club, Fleet 79
Gulfport, MS

Please look for more information in future issues of Scots‘n Water.

1999 Mixed Doubles Regatta
July 24 & 25, 1999
Portage Yacht Club
Portage Lake, Pinckney, MI

This is a new regatta hosted by Fleet 20 that requires one female and one male in the boat.

For more information, contact Forest Rogers at (734) 954-0452, Forest@vibordanamics.com or Jack White at (734) 426-6452, JWhite@erim.org.

Eastern Women’s Invitational Regatta
July 25 & 26, 1999
Deep Creek Lake, Fleet 6
Deep Creek Lake, MD

Come one, come all LADIES! Have a great weekend of sailing and enjoy meeting other women sailors. We have had great winds the last five years at our Regatta. We hope to see you there!

For more information, contact Geri Meehan (703) 369-5065 (h) or at Deep Creek Yacht Club on the weekends at (301) 387-7890.

New England District Championships
August 20 - 22, 1999
Sandy Bay Yacht Club, Fleet 11
Rockport, MA

SBYC has a great website with links to the Rockport Board of Trade, local hotels and restaurants and camping information.

For more information please contact Margot Hifield, (781) 334-2991 or email: Margot.Hifield@us.pwglobal.com.

Annual Whale of a Sail Regatta
September 18 & 19, 1999
Carlyle Sailing Association
Carlyle Lake, IL

This is Carlyle Sailing Association’s annual multi-class regatta featuring an array of mono-hulls, cabin boats and catamarans. Expect 100+ boats with 15-20 Scots, great race management and great food. Excellent camping facilities exist in the State Park next to the CSA harbor.

For more information, contact Bill Clark at (314) 876-3969, cclark@sifnet.com.

Fleet 177 Invitational
August 7 & 8, 1999
Housatonic Boat Club
Stratford, CT

For more information, contact Dave Jacobsen at (203) 263-0796, davidp.jacobsen@worldnet.att.net or Melanie Dunham at fs2601@aol.com or Brian Hayes at brian@od.northsaild.com.

NERD Championships
August 14 & 15, 1999
Saratoga Lake, NY

Sail for the Grail Regatta
September 25 & 26, 1999
Lake Arthur
near Pittsburgh, PA

Fleet 80 invites you to a weekend of competitive sailing at Lake Arthur. We plan to have four races - three on Saturday and one bridge to bridge race on Sunday morning. We usually have 20-25 Flying Scots on the starting line. Dinner Saturday night will be something to remember for “Uncle Charley” will grill the best ribs that you have ever tasted. Camping and motels are located nearby.

For more information, please contact Bob Geiman at (412) 421-6819, rgelman@pop.pitt.edu

Design

The Schurr Sails design team has over 50 years combined experience in the development of fast, easy to set and trim, sails on the market today.

Our record speaks for itself with numerous wins in present and past local, regional, and national events.

Fabrication

Schurr Sails continues to produce the highest quality, most durable sail on the market today. By using quality material and individual construction techniques, each sail is guaranteed to be consistent with the design.

Service

Over the years Schurr Sails has been a proud sponsor of many Flying Scot Association events. With so many class members this is one of the strongest associations in the country and we guarantee to continue to provide you with the individual attention you deserve.
